

FIRE DESTROYS GREAT BALLOON

Count Zeppelin's Mammoth Airship Is Consumed.

FORWARD MOTOR EXPLODES

And the Big Craft Sails Away in a Cloud of Smoke, to Fall, a Hopeless Wreck, in an Open Field—Storm the Initial Cause of the Disaster.

Echterdingen, Aug. 6.—A dramatic end came to Count Zeppelin's long awaited endurance flight in his monster dirigible balloon, and the proud airship which Wednesday was cutting rapidly through the air and outdistancing pursuing automobiles, lies in an open field near here a mass of twisted, useless metal.

A chapter of accidents occasioned by bad moods of nature and by the failure of mechanical appliances combined was responsible for the untimely end of the balloon. Count Zeppelin, its inventor, almost heart-broken and unable longer to endure the sight of his shattered craft, has left by train for Friedrichshafen.

The airship had left Nackenheim, the scene of its first mishap, and over night had visited Mayence and had begun the homeward journey when misfortune overtook it. Soon after its departure, it was found that the front motor was working badly owing to the fusing of metal in the groove in which the piston rod ran. This was caused by friction. Consequently Count Zeppelin was compelled to rely on one motor on the rear platform throughout the night, which considerably reduced his speed. During the night, too, he made an ascent of nearly 6,000 feet, losing a considerable quantity of gas. This deprived the balloon of some of its buoyancy.

Over Echterdingen, Count Zeppelin decided to land. Although this was the first time that such a maneuver had been attempted with a rigid balloon, the landing was effected easily and smoothly, only one of the steel wire stays being broken. The engineers immediately set about making repairs to the balloon, which rode at anchor in the center of a large force of military which had been called out to keep the crowds away. Count Zeppelin telegraphed to Friedrichshafen for more gas cylinders and then went to a neighboring inn for luncheon. He was away somewhat over two hours and was destined to see only the wreck of his airship when he returned.

Large Crowd Present.

The local railway companies ran special cars to convey the curious sightseers to the spot, while pedestrians, automobiles and wagons loaded with peasants also flocked to the vicinity. It is estimated that the crowd around the monarch of the air numbered nearly 40,000.

A wind suddenly sprang up and some of the weatherwise bystanders called the attention of the officers to the fact that a storm was brewing and advised them to secure the balloon. Their warnings were unheeded.

The balloon swayed to and fro, sometimes rising a few feet from the ground. Finally a formidable gust of wind struck the airship broadside. At first the craft heeled over and then her bows rose in the air, carrying with them a number of soldiers holding the ropes. After poising for a moment at a height of fifty feet, it dashed forward against a cluster of fruit trees. The impact uprooted them. The airship returned to the earth and the forward motor exploded.

From the bows of the balloon shot forth a livid flame, while from the rear escaped thick clouds of black smoke, which caused the entire structure to disappear from view. When the air cleared the balloon was seen lying in an open field on a high plateau with only the ragged, tangled strips of the aluminum envelope still remaining. The metal stays and bands and portions of the motors were strewn about like old iron, and were blackened with smoke and scorched.

Officers rushed forward and found that several soldiers had been hurt. The four engineers who were on the forward platform of the airship had escaped death, but were suffering from injuries. They were taken to a hospital. The men tried, when the balloon broke away, to couple up the motors, so as to ascend beyond danger, but in this effort they were unsuccessful.

Count Zeppelin was immediately sent for. When he arrived and saw the hopeless wreck he broke down. His head was bowed on his chest and tears were streaming from his eyes as he stood in an attitude of despair in front of the shattered mammoth aeroplane. Then friends induced him to enter a motor car and return to Stuttgart, whence he left by train for Friedrichshafen.

ROCKEFELLER IN PERIL.

Magnate Has Narrow Escape From Being Hit by Train.

Cleveland, O., Aug. 6.—A man, said bystanders to have been John D. Rockefeller, by quick action probably saved himself and an automobile load of friends from what might have been a serious if not a fatal accident. The machine was being driven along a railroad avenue. At the Cleveland and Ashtabula railway crossing the auto-

JOHN D. ROCKEFELLER.

mobile was stopped while one of the party in the machine talked with a person who hailed them from the side walk. While thus standing a train approached and the gates were lowered.

The west gate fell across the machine and would have hit one of the occupants of the automobile had not the man supposed to be Mr. Rockefeller caught the guard and ordered the chauffeur to go ahead quickly. As they attempted to cross the tracks progress was interfered with by the east gate. The crossing watchman by this time became active and raised the east gate. An instant later the automobile cleared the tracks only a few seconds ahead of the passing train.

HITCHCOCK AND CORTELYOU MEET

Hold Important Political Conference in New York.

New York, Aug. 6.—An important conference between Chairman Frank H. Hitchcock of the Republican national committee and George B. Cortelyou, secretary of the treasury, who managed the Republican campaign four years ago, was held at the Manhattan hotel. Besides talking with Mr. Hitchcock about the political situation generally throughout the country, Secretary Cortelyou is thought to have taken up the question of the governorship of New York. At one time the head of the treasury department was credited in political circles here with being an aspirant for the Republican nomination and he was thought to be favored by some of the state leaders who have opposed the renomination of Hughes. He could not be seen here and Mr. Hitchcock declined to say what was talked about beyond admitting that he heard a great deal more about the state question. He declared that he did not express an opinion or offer a suggestion on the subject himself and that his part was that of a listener.

Representatives Bennett and Parsons, the latter chairman of the New York county Republican committee, were with Mr. Hitchcock for some time, their mission being the discussion of the gubernatorial nomination.

Several parts of the country were heard from by Mr. Hitchcock. He received a call from James T. McCleary, second assistant postmaster general, who is a candidate in Minnesota for a Republican congressional nomination. Mr. McCleary said that he was confident that the Republican state ticket would be elected in Minnesota this fall and that each congressional district would send a Republican to Washington. He expressed the opinion that Governor Johnson would not again take the Democratic nomination.

Charles P. Taft of Cincinnati, brother of the Republican nominee, was a caller at headquarters. He had a long talk with the chairman and then met the local newspaper men. He was greatly amused at their pointed questions concerning the cost of running a campaign, but would not tell how much it was costing him. He parried the questions good naturedly. He said Ohio was safely Republican.

TOWNS OUT OF THE FIRE ZONE

Flames Sweep Past Cranbrook, Michel and Hosmer.

DEATH LIST GROWS SMALLER

Now Estimated That Less Than Forty Persons Perished in the Burned Area—Disaster Has Struck a Hard Blow to the Mining and Smelting Industry.

Vancouver, B. C., Aug. 6.—The destructive forest fires in the Elk River valley have now burned past the region of the towns. Fernie is destroyed, but Michel, Hosmer and Cranbrook are now out of the danger zone. The flames are still devastating the timber region of the valley beyond the settlements. These bush fires may last a month, or until rain falls.

The total loss of life in the burned area is now placed at 38 and the property damage is estimated at between \$5,000,000 and \$6,000,000.

The women and children who were taken from Fernie and placed among the adjacent towns of Frank, Blairmore and Nelson are still in these places of refuge, but the men are back at Fernie and have begun the work of rebuilding the town.

Tents and supplies of food and clothing have been received at Fernie from many places and the people are working strenuously. Nurses and physicians are having a busy time looking after the injured and taking precautions to prevent pestilence. There are now two cases of smallpox in Fernie.

The Fernie disaster has struck a hard blow to the mining and smelting industry of British Columbia. The big smelters of the boundary district, employing 2,000 men, receive the bulk of their coke supplies from the coke ovens and mines of the Elk River valley, and as all collieries in that section are in such condition that it will require months to put them back in a position to supply coal in any quantity, the smelters will be forced to curtail their operations and in some cases shut down. This would throw several thousand men out of employment in the mines of the interior.

WHISKEY WAREHOUSES BURN

Heavy Loss From Fire Occurs at Midway, Ky.

Midway, Ky., Aug. 6.—Six immense bonded whiskey warehouses of Greenbaum Bros. distillery at this place are threatened with total destruction by fire, which started from an unknown cause in the rear of warehouse A and spread rapidly to the others. Four of the buildings were reduced to a mass of ruins and the others are now on fire. The flames have spread to the distillery proper, and a conflagration is threatened which may wipe out the whole town.

Thousands of barrels of whiskey in the warehouses have already burned and the loss from this source alone is estimated now at \$200,000.

As the big warehouses were engulfed in the flames thousands of barrels of whiskey burst and what was not consumed by the fire poured into a branch of Elkhorn creek near by. The whiskey on the water quickly caught fire and the creek became a fiery stream.

ATTENDED BY TAFT.

Session of the Virginia Bar Association at Hot Springs.

Hot Springs, Va., Aug. 6.—Candidate Taft evidenced his intense interest in legal affairs by attending the morning session of the Virginia Bar association and devoting the afternoon to the preparation of the speech on "The Law's Delay," which he is to deliver to that body.

The address of former Senator William Lindsay of Kentucky on "The Man and the Corporation," evoked considerable enthusiasm. Mr. Lindsay pointed out that it was the duty of the states to remedy what he regarded as the present day evil of corporate supremacy over the individual. The states, he maintained, created the corporations and it was their duty to control their creatures. This course, he said, would relieve the federal government from interference, which interference he regarded not only of doubtful constitutionality but of doubtful expediency.

"Marjory, isn't it getting late?" asked Mrs. Munn as she peeped into the parlor at 11:30 and interrupted a conversation between her daughter and her young man.

"Yes, mamma," replied Miss Munn sweetly; "it usually does at this time of night."

Hoop! Hoop! Hurrah!!!

11c

Ladies 15c to 20c Underwear at 11c

See the window full of ladies' underwear that we are selling at 11c. Not a garment but what sells for 15c regularly, and a large number at 17½c and 20c. Both vests and pants—some Misses' garments too. Compare this with any other bargain offered—no matter under what circumstances. But buy all you can use this year—next year too—just think of the price.

"MICHAEL'S" Bargain Basement "MICHAEL'S"

CANADIAN PACIFIC RAILWAY MEN OUT

About Twelve Thousand Mechanics on Strike.

Winnipeg, Man., Aug. 6.—Trade unionism in Canada has given its debt to the Canadian Pacific railway. Without any untoward incident or ostentatious show mechanics and kindred workmen quit work and all shops, big and little, on this great system are idle.

It is estimated that 12,000 men went out, the largest number being 2,200 in Montreal, and 1,500 here. Two thousand men outside of Winnipeg left work between Fort Williams and Vancouver, all at the dictates of the executive committee. Even old workmen in line for pensions went home and it seems to be the most complete tie up in the history of railway shops in this country. All workmen employed around train sheds at depots went out and conductors and engineers caused some delay to service by insisting on trains being properly made up before they would take them out.

Every wheel in the shops stopped and every fire died out when the whistle blew several short blasts, caretakers and shop foremen alone being left to put the places in shape for the period of idleness bound to follow.

The men gathered at their halls to appoint committees to carry on the strike. It was a determined crowd which was present here. A few younger men tried to force an appearance of joviality, but the majority looked as if they fully realized the gravity of the step taken. They did not smile, but there was a grimness in their expression which denoted a resolution to stand by the action they had taken. Neither did they talk much, for their course had been decided upon and the talking stage had been passed. It was decided not appoint pickets at present. It is known, however, that the company has several hundred old country mechanics in cold storage who will be brought to the scene of action at once.

Among the strikers the talk is all on the early termination of the strike. Some are optimistic enough to believe that all will be over this week, relying upon the company to capitulate. There seems, however, to be a strong impression that the company has allowed matters to drift to see how far the men will go, and that the arrival here of William Whyte, second vice president, from Skagway Saturday will see a settlement of the difficulty.

Bristow for United States Senator.

Topeka, Kan., Aug. 6.—The nomination of W. R. Stubbs for governor and J. L. Bristow for United States senator on the Republican ticket at the primaries held Tuesday is now a certainty. Practically complete reports from sixty out of 105 counties give Stubbs a lead of 13,222. Of the 165 legislative districts in the state Bristow has carried at least 89.

John Temple Graves Ill.

New York, Aug. 6.—Colonel John Temple Graves, the candidate for vice president of the Independence party, is at a private hospital, where he will undergo a slight surgical operation. It is expected that he will be out in ten days.

BAFFLES THE POLICE.

Chicago Officers Unable to Solve Murder Mystery.

Chicago, Aug. 6.—Attempts to identify the mutilated and dismembered body of a boy that was found in Mud lake and the Illinois and Michigan canal have brought no results so far. The records of missing persons revealed no one whose description tallied with that of the murdered boy and the police are about ready to allow the case to go down as one of the unsolved murder mysteries of Chicago.

The evident intent of the slayer of the boy was to scatter the remains so that identification would be impossible. Thus far there is every indication that the work was successful in this regard. The legs were found by some boys who were playing near Mud lake, which is a stagnant widening of the south branch of the old bed of the Chicago river. The limbs, wrapped in old cloths, were at first thought to have been thrown away by medical students. This theory was abandoned, however, when decayed human intestines were found in the canal and a little later the hacked torso was discovered by boys who were swimming in the waterway.

Dr. Warren Hunter of the coroner's office made a thorough inspection of the gruesome remains and declared that they had all been part of the same body. He also asserted that the dismemberment had been done by someone ignorant of the principles of anatomy and said that the victim was a boy about seventeen years old.

The only tangible clue that the police have announced is the laundry mark upon a shirt found with the torso. This bore the initials "D. Z." and similar marks were found upon some collars contained in an old satchel picked up on the banks of the canal. A boy's cap, suspenders and other garments also were found in the satchel and the police are inclined to believe that the victim was a stranger in Chicago and came to his death as a result of some feud in one of the Greek or Italian colonies of the city.

The Punishment Fits the Crime.

A new consignment of punsters and professional jokers had just been brought before his Satanic majesty to receive sentence.

"And what shall their punishment be, sire?" asked the hades executioner.

"To the caldron with them," laughed Satan. "Thus may it be put on record that to the very last they 'barked' over with humor."—Lippincott's.

Another Successful Flight.

Washington, Aug. 6.—Captain Baldwin made another successful flight at Fort Meyer in his new dirigible balloon. The balloon, a balloon within a balloon, was tried for the first time. Mr. Curtiss, who again handled the planes and the motor, increased the speed, although the maximum was not attained. Only a short flight was made.

LYNCH VISITS BRYAN AT LATTER'S REQUEST

Assures Nebraskan That Johnson Will Support Him.

Lincoln, Neb., Aug. 6.—Of more than usual significance was the visit to Fairview of Frederick B. Lynch of St. Paul, Democratic national committeeman from Minnesota and manager of Governor Johnson's campaign for the Democratic presidential nomination. Mr. Lynch arrived in company with B. F. Nelson of Minneapolis, president of the state fair association.

The presence of Mr. Lynch at Fairview was at the special request of Mr. Bryan. He lost no time in conveying to the Democratic nominee Governor Johnson's assurance of loyal support and of the governor's intention to take the stump in Mr. Bryan's behalf.

"There is no animosity toward Bryan in Minnesota," said Mr. Lynch. "While I do not promise that the Democrats will carry Minnesota this year I think they have a very good chance."

The business that brought Mr. Nelson to Fairview was to invite Mr. Bryan to attend the state fair in St. Paul and deliver an address. The invitation was accepted, the date being fixed at Aug. 31, but with the understanding that there should be no charge for admission to the grounds on that day.

It was announced that the St. Paul speech would be the only one that Mr. Bryan will make in Minnesota during the campaign. The subject to be discussed will probably be the tariff.

BASEBALL SCORES.

American Association.

At Toledo, 5; St. Paul, 0.
At Columbus, 1; Minneapolis, 0.
At Indianapolis, 6; Milwaukee, 4.
At Louisville, 1; Kansas City, 0.

LOCAL NEWS NOTES

Hammock to close out at cost. Hoffman's. 5416
Judge Fleming returned from Hubert today.
Mrs. P. D. O'Brien went to the twin cities today noon.
Awnings! Awnings!! at D. M. Clark & Co. 2631f

S. Hage, of Madelia, Minn., was in the city last night.

Leon E. Lum, of Duluth, is in the city today on business.

Mrs. C. M. Patek came down from Hubert this afternoon.

All our Lawn Mowers at cost. Hoffman's. 5416

L. J. Cale went to the twin cities this morning on business.

Miss Katie Paine left today for Frazee to visit her sister, Mrs. E. A. Shew.

Col. Potter, of Aitkin, was in the city today on his way home from the twin cities.

Everybody eats the 15-cent lunch at the Ideal Cafe. 481f

The perseverance band will serve ice cream and cake in West Brainerd Friday evening.

Dr. Lausted came down from Duluth last night and is spending the day among friends here.

Mrs. Mary J. Armstrong, mother of Mrs. T. E. Welch, left today for Martinsville Ill., on a short visit.

Baked Fish with cream served Fridays for 15 cent lunch at the Ideal Cafe. (Thursdays tf)

Miss Hildegard Courtney came down today from Hubert, where she had been a guest of Geraldine Fleming.

Mrs. Isaac Peart, of Bemidji, came down today to be the guest of Mrs. Fred Stilings for a couple of weeks.

We will close out our lawn hose at cost from \$3.00 per joint and up. All connections included. Hoffman's. 5416

Murallo, the sanitary wall finish all colors. D. M. Clark & Co. 2771f

Hugh McIntosh, formerly of Brainerd, is a candidate for sheriff of Koochiching county, according to the Duluth Herald.

Newton Gillette, who is working in a cement block factory at Annandale, was in the city this morning greeting friends.

Store your stoves and household goods with D. M. Clark & Co. 2631f

All old members of the high school foot ball team are requested to meet at the Y. M. C. A. Friday evening, at 7:30 p. m.

Miss Margaret Ponth, who has been visiting at the home of Mr. and Mrs. Arthur White, left for her home in Superior today.

Velocipedes, express wagons, air guns and rifles. D. M. Clark & Co. 2771f

Losey and Dean have purchased a handsome profile picture, a relief map of the Yellowstone park which is in their window.

B. L. Hollister, of the Aitkin Age, came down today to meet his parents who arrived from California to make him an extended visit.

J. H. Lichter, of Deerwood, was in the city today. He is limping around as the result of spraining his knee in getting out of a buggy.

Mrs. Frances Newman Dial, who has been teaching the summer school at Little Falls, left today for Power, N. D., to spend her vacation.

Cool off. Get a White Mountain or Arctic ice cream freezer. D. M. Clark & Co. 2771f

Rev. M. S. Hostager, of Cloquet, Minn., will preach in the Norwegian Lutheran church on 7th street Sunday morning and evening, August 9.

D. M. Clark & Co. have received their new spring line of lace curtains and draperies. 2631f

"Four Corners of the Earth," a melodrama, will be the next attraction at the opera house. It is scheduled to appear in Brainerd Monday, August 17.

Mr. and Mrs. W. C. White and Mr. and Mrs. Cuyler Adams, of Deerwood, passed through Brainerd today on their way to Yellowstone Park for an outing.

The three best made, Paragon, Ocean Wave and O. K. washing machines. D. M. Clark & Co. 2771f

Dr. Moorehouse returned last night from a visit to Kansas City, Mo., and in central Kansas, and expects to occupy the pulpit in the First Congregational church on Sunday morning.

The regular prayer service at the Methodist Episcopal church will be held this evening by the pastor. The choir practice follows the service. All are invited.

Jacob Schmidt's bottle beer is delicious. We have the agency. Order a case. Telephone 164 John Coates Liquor Co. tf

Mrs. A. L. Mattes and daughter, of Prince Albert, Saskatchewan, are in the city visiting at the home of Mr. and Mrs. W. I. Storm, on North Ninth street.

According to a telegram from Aitkin to the Duluth Herald the people of that town are agitating the construction of a trolley line to Rabbit Lake. If they do that will cut Brainerd off from any home profit from the mining district.

Does baby want a go-cart? We have what you want. D. M. Clark & Co. 2771f

Alfred Swanson, who graduated last week from the scientific course in Valparaiso University, Valparaiso, Ind., arrived home Tuesday night accompanied by his brother Albert who went down to attend the commencement exercises. Alfred will take up the study of law at the U. of M. next September.

D. M. Clark & Co. the largest in tallment house in the city. Goods sold on small payments. 2631f

The Sunday school picnic of the Methodist Episcopal church held at Merrifield yesterday proved to be a most enjoyable one. Three coaches took the crowd out which was an exceedingly large one. The day was spent in boating, fishing, bathing and base ball playing. The place and the day was all that could be expected, the crowd returning in good spirits in the evening. Owing to the day being so taken up with other out-of-door sports the running races for prizes were postponed until one evening next week, the place to be named later.

Attention sportsmen! We have a full new line of trap shells, no left overs. D. M. Clark & Co. 2771f

Take Hall's Family Pills for constipation.

China, a Collection of Nations.

China is not a nation in the sense in which we ordinarily use the word. If we picture to ourselves the countries of Europe, with their different languages and different customs, drawn together into a loose confederation under the government of a conquering race, we shall have some small conception of what this Chinese "nation" really is. The peoples of these different European countries are all Caucasians. The different peoples of China are all Mongolians. These Chinese peoples speak eighteen or twenty distinct languages, each divided into almost innumerable dialects and subdialects. They are governed by Manchu, or Tartar, conquerors who spring from a different stock, wear different costumes and speak among themselves a language wholly different from any of the eighteen or twenty native tongues. —Samuel Merwin in Success Magazine.

A good gamecock has no white feather in its plumage, and hence the synonym for cowardice—"to show the white feather."

THE PLANET JUPITER

A Monster World, 1,300 Times
the Size of Ours.

WHIRLS WITH AWFUL SPEED.

It Spins Around at Such a Fearful Gait That a Furious Gale Perpetually Encircles Its Equator—Its Possible Inhabitants and Its Moons.

It is curious how little the average person knows about Jupiter. He has heard a lot, too much perhaps, about Mars, but that world, 1,300 times the size of ours, whirling in the terrible outer distance of space with its five moons, its 144 months yearly, known as Jupiter is almost if not quite a mystery.

In the first place, Jupiter, according to some astronomers, is inhabited. So are some of its moons, in the midst of which the great planet spins around like a top at such tremendous speed that it causes around the equator a furious wind that blows perpetually at a rate of about 250 miles an hour.

In the midst of this never ending, howling gale live the Jovians. Some astronomers say that because Jupiter is so much bigger and heavier than the earth no creature of any weight can support itself. A man weighing 200 pounds on this earth would, if carried to Jupiter, weigh 500 pounds, and reasoning thus, they believe that nothing bigger than a cat could stand on this vast world.

But this is no doubt a mistake. If Jupiter stood still or revolved no faster than our earth all that astronomy says would be true, and a terrestrial man could not stand upon its surface. But as a fact the tremendous rate of revolution is so much faster than the earth's that in spite of its monstrous size it turns about in less than ten hours as against our twenty-four hours.

As it is, a man of normal earthly size, if transported to the equator of Jupiter, would actually feel much lighter than he does here on earth, because the swift rotation of the planet would almost lift him from his feet and throw him into the heavens. He would feel so light that the 250 mile an hour tornado that blows incessantly would pick him up and carry him around and around the planet like a speck of dust.

In order to keep on his feet the Jovian man or woman would have to be about fifty feet tall. Some of them would doubtless reach the height of fifty-five feet. Like all big bodies, the Jovian would have a tendency to slowness of motion. Having once seated himself, he would spend a good twelve hours at his dinner and would probably throw up his job if his employer allowed him less than six hours for his lunch.

The oceans of Jupiter, torn into fury by the hurricanes, would pay no attention to one moon such as moves the tides on our earth, and it takes no fewer than five of these satellites to perform this work for Jupiter. They travel at various rates of speed, some flying very close to Jupiter's surface and others far off. They have atmospheres somewhat like ours on earth, and a moonlight on Jupiter is indeed a glorious sight, for these moons have a variety of colors. Two are blue, one is yellow and one red.

Jupiter needs all its moons at night for illumination, for without them its five hours of darkness would be black indeed. So distant is the sun that broad daylight is hardly brighter than twilight on earth, and one lone moon would not reflect enough of the sun's rays to guide the Jovian footsteps.

In the polar and semipolar areas the 250 mile an hour tornado of the equator is not present. Doubtless there are eddies and occasional windstorms such as there are on earth. And in these localities it is possible for smaller creatures to exist, and here, too, vegetation would flourish. The food supply of Jupiter must come from these areas, where it is cultivated and shipped to the equatorial regions by the diminutive races. The polar oceans are not frozen because of the great internal heat of Jupiter. And on these still oceans probably ships not greatly different from ours ply, but about the equator the unending storm would make surface sailing impossible.

If there are ships at all at the equator they are submarines, which dive into the calm depths beneath the surface. Locomotion by flying machines is extremely easy on the equator because, by taking advantage of the wind, the Jovians can navigate their planet at tremendous speed.

It is possible that because of the noise in the wind swept equator the Jovian is deaf.

Quite likely, on the other hand, he has good ears, but with a device, either artificial or contributed by nature, for stopping his ears, except when he wishes to listen.

This tremendous, good natured Jovian has a leather-like skin to protect himself from the scratches of flying things and a device for sifting the air that he breathes, for Jovian atmosphere is full of dust, and in spite of the difficulties of his existence he is a long lived gentleman. On the average he exists for about 800 of our years. Probably many a Jovian exists a full thousand of our little years.—Detroit News-Tribune.

None of us may know when the echo of a careless word will cease vibrating in the hearts of some that hear.

616 Laurel Street.

Brainerd, Minn.

ANOTHER MAN GETS HIS LEG BROKEN

Walter McIntosh Met Accident
in Parker Basement Yes-
terday Afternoon

BOTH MEN ARE DOING WELL

Abear and McIntosh are Both at
Same Hospital and are Get-
ting Along Well

Two accidents, in the excavation for new buildings, within an hour is the record for Wednesday afternoon. The injury to Peter Abear, which was reported in THE DISPATCH of that evening, was followed, about an hour later by similar one on the Parker building on Front street, of which Walter McIntosh was the victim.

The workmen engaged in excavating for the basement were undermining a little piece of brick wall which had been left under the sidewalk when the ruins of the old building were taken away. McIntosh with others was engaged in the work, and though the wall was expected to fall he, according to his fellow workmen, was not watching it closely and it caught him when it tumbled, breaking one of his legs. He was taken to St. Joseph's hospital and the fracture reduced and he is getting along nicely today.

What Shall We Have for Dessert?
Try JELL-O, the dainty, appetizing, economical dessert. Can be prepared instantly—simply add boiling water and serve when cool. Flavored just right; sweetened just right; perfect in every way. A few packages makes enough dessert for a large family. All grocers sell it. Don't accept substitutes. JELL-O complies with all Pure Food Laws. 7 flavors—Lemon, Orange, Raspberry, Strawberry, Chocolate, Cherry, Peach.

Shoe Shop Moved
To Ransford block, corner 6th and Front street. All repairing done neatly and promptly.
53-t6 JOS. FRANKE, Shoemaker.

Notice to Union Men of Brainerd
The report has been circulated in your city, among other untrue statements, that the Segerstrom Piano Co. are handling pianos made by unfair labor; and in defense against such false statements we wish to call your attention to the following letter:
Minneapolis, Minn., Aug. 4, '08.
Mr. L. M. Rush,
Brainerd, Minn.

Dear Sir:
In answer to your letter of recent date inquiring as to whether our pianos are made by union labor or not. I wish to say that we have always been favorable to union labor and have always endeavored to handle goods that were made by unions.

The Labor Review of this city informs me that they are on the list as being very favorable to union labor, in fact as much so as any piano firm in existence today. If this concern was unfair to union labor we would absolutely refuse to handle their goods and you know that we have expressed ourselves along these lines before.

There are a few factories that are listed in the Labor Review as being unfair to union labor, but there is not one of our factories on the list, so I was informed by the Labor Review this morning.

If there is anyone in Brainerd that questions this statement, you may ask them to write to the Piano and Organ Worker's union, of Chicago, and they will give them all the information along these lines that they may desire.

Thanking you very much for your inquiry, I beg to remain
Yours truly

SEGERSTROM PIANO CO.
Per E. B. Segerstrom.

Now we believe that the broad-minded thinking people of Brainerd can readily see why such reports are circulated. It is simply the old story of "the dog in the manger." We are selling pianos of highest quality, at prices unheard of in your city. Call and see for yourself. Don't be a knocker.

For Sore Feet
"I have found Bucklen's Arnica Salve to be the proper thing to use for sore feet, as well as for healing burns, sores, cuts, and all manner of abrasions," writes Mr. W. Stone, of East Poland, Maine. It is the proper thing too for piles. Try it! Sold under guarantee at H. P. Dunn's drug store. 25c. tts

For County Commissioner
I hereby announce myself a candidate for the republican party nomination for county commissioner from the first district, and respectfully ask the support of all voters of the district.
P. J. ALBERTSON.

The Time and the Price.
"Have you some good shoes for boys?" asked the mother over the phone.
"We have a line of very serviceable knockabout shoes, madam," replied the salesman who had responded to the call.
"What are the prices?"
"Four to eight, \$1; nine to twelve, \$1.25; two to five, \$1.50, madam."
"I can't possibly be out shopping at such an outlandish hour as 4 in the morning, but I'll do my best to get there by 7:30, so please save me a pair at \$1."—Judge's Library.

Sewell-Diver
A very pleasant wedding took place at the home of Mr. and Mrs. J. T. Sewell 8 miles south of the city, on Wednesday, when their son, Burpee C. was united in marriage to Miss Harriet E. Diver, recently of England. The ceremony which included a simple ring service was performed by Rev. J. E. Abramson at high noon, in the presence of a few intimate friends and near relatives.

The bride wore a white silk gown and carried roses, the groom was dressed in conventional black. The couple were attended by the groom's two brothers and Miss Maude and Grace Caughey. Minnie Anderson attended as flower girl. A sumptuous dinner was served immediately after the ceremony. The presents were very choice and at the same time useful.

The young people will commence housekeeping at once on their farm a mile south of Mr. Sewell's old home. The groom is a Crow Wing Co. boy and man of striking character. The bride is in every way a worthy companion.

Rheumatism promptly driven from the blood with Dr. Shoop's Rheumatic Remedy. A test will surely tell. In tablet or liquid form. Sold by H. P. Dunn. t t

Real Fishing.
It is the waiting that is the real thing, that joy of expectancy which is a continuous picnic for the tranquil reveries, that serene vision which sees the fishes hobnobbing with the bait and admires their wisdom in refusing to bite. Then is when philosophy sits harmonizing all things with a beautiful contingency. Of course the ecstasy of a nibble is welcome, but if it passes unrealized there is the thrill left in all the ganglions of memory to lighten the heart for hours or days afterward.

Fishing isn't simply catching something. It is sitting in silence where the sunbeams filter through the green leaves and the turtle creeps safely upon yonder log and the woodpecker thrums in the dead tree near by—there, seeking communion with the underworld and playing with one's fancies down in the green waters—that's fishing. Sometimes one catches something, and the excitement breaks in on the glorious serenity, but he hastily puts on another worm, only to resume the joy of his waiting and to let his thoughts run happy with the fishes in and out of their crystal homes.—Columbus Journal

Timothy and clover \$8.00 to \$9.00 per ton.	

Where the Funds Went.
As an instance of the happy go lucky character of the early ducky following extract from the Albany (N. Y.) city records may prove interesting:

"In 1826 the trustees of the African Baptist church applied to the common council for permission to circulate a public subscription paper in aid of the funds of the church. It was moved to lay the petition on the table, pending investigation, for the reason that the principal part of the funds secured by a previous subscription for the African church had been used by the trustees in 'treating themselves to hot suppers.'"

Presidential Succession.
During the first session of the Forty-ninth congress (1885-7) the presidential succession was fixed as follows: In case of the death or removal of both president and vice president the secretary of state shall act as president until the disability of the president be removed or a president is elected. If there be no secretary of state, the secretary of the treasury shall act as president. And the succession passes in like manner to the secretary of war, the attorney general, the secretary of the navy and the secretary of the interior, in the order here given.

Cultivate Your Power.
Do not pray for easy lives. Pray to be stronger men. Do not pray for tasks equal to your powers. Pray for powers equal to your tasks. Then the doing of your work shall be no miracle. But you shall be a miracle. Every day you shall wonder at yourself, at the richness of life which has come in by the grace of God.—Phillips Brooks.

Faded.
Tess—Yes, she said her husband married her for her beauty. What do you think of that? Jess—Well, I think her husband must feel like a widower now.—Philadelphia Press.

BRAINERD MILL EQUAL OF ANY

No Mill in Northwest Will be
More Up-to-Date Than Brainerd Will Have

MILL WRIGHTS NEARLY THROUGH
Expected that Mill Will Commence Grinding in About Two Weeks

The mill wrights will finish their work of rebuilding the Brainerd mill early next week and the head miller will then start the machinery. That it will take some time to get it properly adjusted is practically certain and the management is setting no date for the commencement of business. It will probably be about two weeks, however, before it is running in full blast.

The mill with its new equipment, has a capacity of about 100 barrels per day of 24 hours and it is expected that it will be run night and day. It will be equipped with six sets of double rolls, two sifters and other machinery to match. One of the new features will be a bleacher. This machine, by means of a current of air turned against a cylinder in which the flour is revolved, cools it and whitens it and as the miller terms it "ages" the flour. It has long been known that one reason the big milling companies could put better flour on the market than the small mills was because they had sufficient capital and warehouse room to hold the flour several months or a year before selling it. Under the new process to be used in the Brainerd mill this result is obtained at once and new flour, or flour made from new wheat, will make as good and as white bread as flour from old wheat which has aged after being ground.

The Brainerd Milling Company has put over \$6000 into improvements in the mill, in addition to the purchase price. They stated when they began work that while they would appreciate the patronage of Brainerd people they did not and would not ask it because they were a Brainerd concern, but because they would make the best flour on the market.

Mr. J. L. Hamel, who is in charge of the rebuilding of the mill for the Mardye-Marmon people who have the contract for the machinery, etc., in conversation with the DISPATCH representative, stated there was not a better mill, or one which could make better flour, in the United States. Such being the case the Brainerd people should make it a matter of duty to insist on their grocers sending them Brainerd flour.

Strengthen your weak stomach, heart, and kidney nerves with Dr. Shoop's Restorative. Don't drug the stomach nor stimulate the heart or kidneys. That is wrong. Vitalize these weak inside nerves with Dr. Shoop's Restorative and see how fast good health will come to you. Sold by H. P. Dunn. t

BASE BALL NOTES

The North Star Juniors defeated Verdale yesterday by a score of 6 to 5 in a game which was spectacular at times by reason of the fast plays made. Dean White was in the box for Brainerd, and while he did not have his usual control and issued a few passes only two hits were got off his delivery. He was well supported and the game was a fast one.

The North Stars will go to Perham next Sunday and play there in the afternoon.

She Likes Good Things

Mrs. Chas. E. Smith, of West Franklin, Maine, says: "I like good things and have adopted Dr. King's New Life Pills as our family laxative medicine, because they are good and do their work without making a fuss about it." These painless purifiers sold at H. P. Dunn's drug store. 25c. tts

Why James Lee Got Well

Everybody in Zanesville, O., knows Mrs. Mary Lee, of rural route 8. She writes: "My husband James Lee, firmly believes he owes his life to the use of Dr. King's New Discovery. His lungs were so severely affected that consumption seemed inevitable, when a friend recommended New Discovery. We tried it, and its use has restored him to perfect health." Dr. King's New Discovery is the king of throat and lung remedies. For coughs and colds it has no equal. The first dose gives relief. Try it! Sold under guarantee at H. P. Dunn's drug store. 50c. and \$1.00. Trial bottle free. tts

Any pain stopped in 20 minutes sure. Dr. Shoop's Pink Pain Tablets quickly stop headache, pains of women, etc., 20 tablets 25c. Sold by H. P. Dunn. tt

DEERWOOD NOTES

Miss Dalie L. Wetzel left a week ago Monday for Duluth, where she will spend the time at the normal until school begins again studying primary methods and preparing for a first grade certificate.

Paul K. Wetzel was a Brainerd visitor between trains on Monday.

Monday afternoon six young ladies and Mrs. Murphy came down on the train from Brainerd remaining until the midnight train. They took supper at the Tourist's Home.

Mr. Forman and his friend Mr. Sonnie, from Chicago, are spending their vacation at the Tourist's Home.

Dr. Archibald and a Mr. Thompson, from Troy, N. Y., have been domiciled at the Tourist's Home for the past month.

Gust Fredericks, from Cedar Lake, was around the last of the week with fresh eggs and mutton. Eggs sell well at this time of the year and demand a big price.

The Y. M. C. A. boys from Duluth came up on Monday and will camp at their old camping grounds for two weeks. Camp Miller is a popular camp and this is certainly an ideal outing for boys who are overseen by trustworthy men.

Miss Maud Hage and Miss Norma Wright went to Brainerd Tuesday noon, returning Thursday afternoon. They were sent as delegates to the county convention from the Deerwood Sunday school.

Miss Helen Thompson, a niece of Mrs. Hage, came up from the southern part of the state and will visit relatives for a few weeks.

Mr. and Mrs. Shelton, from Rhineland, Wis., came up on Monday noon to visit with Judge and Mrs. A. J. Vinji for a while.

Since the work train is stationed at Deerwood it keeps the men hustling to find boarding places, as nearly all the available places are taken by summer people first.

Raspberries are ripening fast and demand a good price in all the markets. Although they are not as plentiful as last year the difference in price will make the profit about the same.

Miss Olga A. Wetzel left on Thursday for a ten days visit at the twin cities and Manchester, Iowa, with friends.

Mr. and Mrs. Guy Casey, from Aitkin, have rented the cottage from Harry Patterson. They have as their guests Mr. and Mrs. Minette from Fargo, N. D.

At the school election Paul K. Wetzel was elected director for a term of three years.

At the wreck at Barker a week ago Mail Clerk Wetzel was pretty badly bruised and received quite a nervous shock and it is wonderful he was not killed considering how the mail car was splintered. He is home for a rest and is in hopes no complications of any kind set in.

The band boys are invited out to Cedar Lake at Fritz Hamdoef's for supper Sunday evening. They will go by train leaving Deerwood on the 3 o'clock train, returning on the 11:21. Mr. Hamdoef will meet them by team at the station and the boys will no doubt have an enjoyable time. Mr. and Mrs. Hamdoef are royal entertainers. Their son Henry Hamdoef plays first cornet in the band so are naturally much interested in the band.

Mr. and Mrs. Ole Norseth are the proud parents of a baby girl born July 27th.

Mrs. Norseth and little daughter Margaret, from St. Paul, came down the 23d of July to spend a couple of months with Mr. and Mrs. Ole Norseth. John Oberg's store is coming along in fine shape and we are in hopes John will be serving ice cream before cold weather.

Some of the boarders at the Tourist's Home had a hay rack party out to Bay Lake Tuesday evening. We know from the noise they made that they were having a good time.

Miss Minnie Parish, from Pine City, is here visiting her uncle, Rev. Parish, for a few days.

Excellent Health Advice

Mrs. M. M. Davison, of No. 379 Gifford Ave., San Jose, Cal., says: "The worth of Electric Bitters as a general family remedy, for headache, biliousness and torpor of the liver and bowels is so pronounced that I am prompted to say a word in its favor, for the benefit of those seeking relief from such afflictions. There is more health for the digestive organs in a bottle of Electric Bitters than in any other remedy I know of." Sold under guarantee at H. P. Dunn's drug store. 50c. tts

"Jove, you acted awfully well last night!"

"Indeed! The audience did not seem to think so. They did not applaud a bit when I made my exit from the stage."

"Oh, but I'm sure they were awfully pleased!"—London Opinion.

"Health Coffee" is the cleverest imitation of real coffee ever yet made. Dr. Shoop created it from pure parched grains, malt, nuts, etc. Fine in flavor—is made in just one minute. No 20 or 30 minutes tedious boiling. Sample free. McGinn & Smith. t t

Opening Piano Sale

YOU have read all about it and we take it that you are just as wide-awake as we are—and on watch. If you buy a Piano of us today you add a clean profit to your assets of \$150 to \$250—a good month's salary. You owe an investigation to yourself.

Pianos	made to sell for \$300.00 sale price	\$147
Pianos	made to sell for \$350.00 sale price	\$187
Pianos	made to sell for \$400.00 sale price	\$218

SEVERE STORMS BREAK HOT WAVE

Bring Relief to New York and
New England States.

TEN DEATHS FROM THE HEAT

Occur in the Metropolis Before the
First Cooling Breeze Comes—Con-
siderable Property Damage Done by
the Storm—Cooler at Chicago.

New York, Aug. 6.—Severe elec-
trical storms, accompanied by heavy
rain and in some instances by damag-
ing showers of hail, broke the heat
wave that has been afflicting New
York and the New England states.
The storm brought great relief to this
city, for during the day ten deaths
and more than twenty prostrations
were caused by the heat and exces-
sive humidity. Even early in the day
the hospitals were caring for many
prostrated. The mercury stood at 90
degrees at 2 o'clock and was still as-
cending an hour later when the first
cooling breeze came. In a few min-
utes it had dropped ten degrees and
by nightfall there was little to com-
plain of.

From all sections of New England
and New York came reports of dam-
age done by the storm. Lightning
struck in many places, and at Green
Island, near Troy, N. Y., Mrs. Thomas
McCabe was killed by a bolt.

At Jamestown, N. Y., the storm was
especially severe, driving several
craft ashore on Chautauqua lake.

Four Rhode Island churches were
struck by lightning, the one at Providence
being levelled to the ground.
Total loss of more than \$10,000.

Among those killed by the heat in
this city was the Rev. Edward Wal-
lace-Neil, pastor of the Protestant
Episcopal Church of St. Edward the
Martyr. He was overcome just be-
fore he had officiated at morning
service and died within a few minutes.

COOLER IN CHICAGO.

But Three Residents of That City Suc-
cumb to the Heat.

Chicago, Aug. 6.—Despite a decid-
ed change for the better in weather
conditions here, three more residents
died as the result of heat prostrations.
Early in the day the humidity was
high and the temperature increased
steadily until after 1 o'clock. Then
a shift in the wind sent the humidity
mark down to 39 per cent and also
halted the increase in the heat wave.
The ill effects of the previous day's
heat was still apparent in the ten-
ement districts, where the mortality
rate among infants has become ab-
normally high. Because of the in-
creased use of water on park and
private lawns the water supply in
some residence sections has dwindled.

JOHN G. LUND A SUICIDE.

Prominent Minneapolis Man Ends
Life With a Bullet.

Minneapolis, Aug. 6.—John G. Lund,
one of the most prominent real estate
men in the Northwest, committed sui-
cide in his private office in this city.
He shot himself in the head directly
behind the right ear. Death followed
almost instantly. Business difficul-
ties, grief over the death about a year
ago of his wife and a general impair-
ment of his own health are believed
to have induced despondency that led

to Mr. Lund's act of self-destruction.
Since his wife's death, his friends say,
he had never ceased to mourn. Money
losses, too, had troubled him serious-
ly. Negotiations made by several of
his agents proved to be fraudulent.
It is said, and he had been called upon
to square all the deals. This caused
his fortune, which was at one time
estimated at several hundred thousand
dollars, to diminish rapidly, and cred-
itors were besieging him from every
side. Several cases had been settled
without litigation, but it is believed
that he could have gone no further
without declaring himself a bankrupt.

PARADE IN BOSTON.

Ten Thousand Pythians March
Through the Streets.

Boston, Aug. 6.—Ten thousand
members of the subordinate lodges of
the Knights of Pythias paraded
through Boston's streets. Never be-
fore in Boston has there been a pa-
rade marked by such diversity of fea-
tures, so much color and originality
in the various floats.

No business was transacted by the
Pythians during the day.

There seems to be no doubt that
Henry P. Brown of Texas will be
elected supreme chancellor. Milwau-
kee appears to be leading for the place
of holding the next convention.

THAW GETS AN OUTING.

Law's Delays Make Excursion Possi-
ble for Famous Prisoner.

Poughkeepsie, N. Y., Aug. 6.—Harry
K. Thaw had an outing consisting of
a trip to Fishkill Landing, sixteen
miles away, a trolley ride of five
miles and a return trip by river
steamer to this city.

The law's delays made this little ex-
cursion possible. Thaw has a suit
pending before Referee John F.
Schlosser at Fishkill Landing to fix
the value of the services of Dr. John
P. Wilson, one of his experts, who tes-
tified in his habeas corpus suits.

The first hearing was fixed for 11
a. m. Thaw was on time, in charge
of Under Sheriff John M. Townsend
and Deputy Sheriff W. A. McCabe.
The lawyers were not ready, however,
and the referee was called away on
business.

Two adjournments were taken and
to while away the time, Thaw, ac-
companied by the sheriff's officers,
took a ride by trolley to Fishkill vil-
lage. The return trip to Poughkeepsie
was made by steamer.

Old Outlaw Killed.

Douglas, Ariz., Aug. 6.—William F.
Downing, a member of the old Stiles-
Alford band of outlaws who ten years
ago operated in Southern Arizona,
was killed in his saloon at Wilcox by
an Arizona ranger, William Speed.
Speed sought to serve Downing with
a warrant when the latter, it is said,
displayed a gun, whereupon Speed
fired.

Disastrous Fire in Germany.

Donaueschingen, Germany, Aug. 6.
—A number of persons were burned
to death and 100 houses were de-
stroyed by fire here. There was no
water with which to extinguish the
flames, but fortunately a heavy rain
fell and stopped the progress of the
conflagration.

Killed While Trying to Escape.

San Francisco, Aug. 6.—William
English, a private in Company 115,
coast artillery, awaiting trial for de-
sertion, was shot and killed at the
Presidio while trying to escape.

Russian Consul Stabbed.

Shanghai, Aug. 6.—The Russian
consul at Tientsin, M. Poppe, was
stabbed and it is not expected that he
will recover from his wound. His as-
sailant escaped.

MARKET QUOTATIONS.

Minneapolis Wheat.
Minneapolis, Aug. 5.—Wheat—Sept.,

SMOKELESS WARSHIP

Swift, Noiseless Fighting Vessel
Predicted by an Engineer.

WHOLE DECK FOR GUN PLAY

No Stacks to Obstruct Fire, and All
Vulnerable Parts Will Be Below Wa-
ter Line—Great Saving of Coal
Steam Radius Will Be Increased.

"War vessels of the future will be
swift, smokeless, noiseless, the craft
lying low in the water, with every
vulnerable part below the water line
the entire deck being given over to the
work of the guns. There will be no
smoke because there will be no smoke
stacks. In the nighttime there will be
nothing to betray the presence of the
invincible fighting demon to the enemy."

This prediction was recently made by
Robert Haywood Fernald, mechanical
engineer, who has for several years
been connected with the fuel investi-
gations of the United States geological
survey in behalf of the government's
campaign for the conservation of the
natural resources of the country. Mr.
Fernald believes that the gas engine
or internal combustion motor, as it is
called by engineers, will be installed in
naval vessels of the United States
within the next few years.

The purpose of the government has
been to develop the gas engine as a
means of conserving the coal supply.
Experts declare that if the present in-
crease in consumption keeps up the
better part of the coal will be gone be-
fore the close of the next century and
that the nation will long before that
feel the effects of a waning supply.
The government itself spends \$10,000,
000 yearly for coal, and it was primar-
ily to get the best results from this ex-
penditure that the investigation of the
gas producer and gas engine was taken
up.

"I expect to see the United States
ahead of every other nation in this in-
novation," said Mr. Fernald. "The gas
engine, in my opinion, is feasible on
any vessel because of its economy over
the steam engine, but it is especially
desirable on the fighting ship for the
reason that it makes no smoke. The
gas is generated in a producer, which
has no chimney and needs none. The
coal is turned directly into gas, which
goes straight to the engine."

"The smoke nuisance has been a seri-
ous problem to the navies of the world
for a number of years. In the day-
time the presence of an enemy's ship
has been discovered miles away by the
smoke from its stacks, and in the night
flames from the tops of the stacks
have spoiled many a well laid plan of
attack."

"The elimination of the smoke is
sufficient to call for the installation of
the gas engine, yet there are many
other features in its favor. The vessel
would have a free deck for the play
of its big guns. There would be no
towering stacks to puncture or destroy,
thus perhaps crippling the boat. Then
it would be unnecessary to carry as
much coal, for the same power can be
developed with one-third less than the
steam engine uses. The gas producer
and the gas engine would take up less
room and weight than the same power
Scotch boiler and steam engines. If it
were necessary it would be possible to
carry more coal, which would give the
vessel a radius of travel far greater
than at present."

"Of course I do not expect to see gas
engines confined to the use of the
navy. The fact that it shows econ-
omy will compel its installation in all
sorts of vessels. One of the big items
of expense to the modern ocean liner
is its coal bill. These vessels will con-
sume 10,000 tons of high grade coal on
a round trip. With the gas engine this
could be reduced to 6,000 or 7,000
tons, a saving of several thousand dol-
lars."

"One of the big steamship companies
of the great lakes is about to make
the initiative in this movement. Plans
have been made for a freighter that
will use a 2,000 horsepower gas engine.
This company is not making the ex-
periment because of the smoke from
the stacks of its vessels, but to demon-
strate the economy of the gas engine
over the steam engine. At present this
concern is paying \$3 a ton for coal,
and its managers figure a considerable
saving if the gas engine proves a suc-
cess in marine work, and I see no rea-
son why it should not. Already the
marine type of gas engine has been
designed up to 2,000 horsepower. The
future will see much larger units."

"The government, through the United
States geological survey, has been ex-
perimenting with the gas producer and
gas engine for several years and has
demonstrated that this type of engine
in a stationary plant is capable of gen-
erating from twice to three times as
much power from a given amount of
coal as the steam engine. It has also
shown that the gas engine can develop
more power from a low grade coal,
such as lignite of North Dakota, than
the steam engine can with the same
weight of the best bituminous coal."

"The tests in the gas producer at the
government plant have shown that
many fuels of such low grade as to be
practically valueless for steam fur-
nace purposes, including slack coal,
bone coal and lignite, may be economi-
cally converted into producer gas and
may thus generate sufficient gas power
to render them of high commercial
value. In this way lignite beds un-
derlying from 20,000,000 to 30,000,000
acres of public lands, heretofore sup-
posed to have little or no commercial
value, are shown to have a large value
for power development. This is of im-
portance to the west."

MOVING PICTURES' NEW USE.

Modern Farming Methods to Be Shown
in Novel Way.

Like the photograph, the moving pic-
ture machine is to be made to serve
a more worthy purpose than gathering
in the nickels and dimes at small the-
ater doors. It is to be put to the most
practical purpose imaginable—showing
modern methods on the farm.

C. W. Martin, an Omaha insurance
man, has demonstrated that the mov-
ing picture machine was made for a
more worthy purpose than reproduc-
ing a prize fight by rounds, showing
children how daring firemen rescue
people from burning buildings or
throwing upon a white sheet a Mex-
ican bullfight or the dancers of a bal-
let show.

As a result of a conference with the
managers of the national corn ex-
position, which is to be held at Omaha
Dec. 9 to 19, Martin is visiting the
"model" farms of Illinois, Iowa and
Nebraska and making pictures which
are to be later shown at the big agri-
cultural show in Omaha and the vari-
ous colleges and experiment stations in
the west. Farmers will be shown on
the canvas using the latest planting,
cultivating and harvesting machinery,
says an Omaha correspondent of the
Chicago News. While a lecturer ex-
plains the process the model farmers
will be seen going about their work.

Every one will be interested in
knowing something more of the pro-
cess responsible for the loaf of bread
that comes to the table daily. The
moving picture camera will show the
modern wheat drill at seeding time,
the perfection self binder which cuts
the grain, binds, bunches, ready for
the shockers at one process, and the
modern steam thrasher which cuts the
bands from the bundles, feeds the
grain into the machine with more than
human precision, separates the grain
from the straw, fans and cleans it
ready for the great mills and elevates
the grain into the wagon ready for its
journey from the farm to the flouring
mills.

TIN CAN CLUBS.

Their Mission Is to Supply the De-
mand For New Forests.

B. H. Green of Monterey, Cal., has
sent out a circular giving information
regarding the tin can clubs through
whose beneficent activities he expects
to see the United States supplied with
needed forests.

The attempts to cultivate tree claims
in the Dakotas many years ago were
rather discouraging, says the National
Magazine, but Mr. Green insists that
he has been successful in planting tree
seeds, nuts and cuttings in refuse tin
cans and can now show an oak tree
twenty feet high only eight years of
age, and also a redwood tree, grown
from seed, which is now fully thirty
feet high and only twelve years of age.

Mr. Green insists that a tomato can
with a fair sized hole punched in the
bottom and filled with good earth is
just the thing needed to start a tree in
and that if the earth is never allowed
to become dry the growth of the young
tree will be amazing. Later the little
trees are transplanted without remov-
ing from the cans, for the rust eats
away the can sufficiently to allow the
roots to free themselves as they need
more room.

Taft Club of Fat Men.

The giants who shackle hogs and las-
so cattle in the Chicago stockyards
have organized the first "fat man's
Taft club." No man is eligible who
weighs less than 230 pounds. Frank
L. Beveridge, a commission man, who
weighs 285, is the president.

One member weighs 360 and is still
growing up and out. He is Everett
Jackson, twenty-eight years old. This
is their platform:

"Realizing the heavy importance of
good and well bred men working to-
gether in harmony and in view of add-
ing weight to the political situation
and showing our preponderant appre-
ciation of the greatness of our Republican
convention in nominating such a large
and manly expansionist as they did,
we hereby organize ourselves in what
will be termed 'a fat man's Taft club
of the Union stockyards of Chicago.'"

New Job For Women.

The steamship Carmania of the Cun-
ard line has a woman assistant for
the purser to answer many of the
questions which that hard worked au-
thority is asked previous to the sail-
ing of the vessel. She is Miss Cath-
arine Leith, who is described in the
passenger list as "typo and steno." It
is said that other ocean liners may
adopt the idea.

Ode by an Olympic Competitor.

[A poem written by the young Uni-
versity of Virginia sprinter James Alcorn
Rector just before departing for London
to participate in the Olympic games.]
I've heard about the enchanted lands—
Ye fairy lands—and all.
But when I die just let me rest
Way down in Arkansas.

Where may ye find such mountains?
Search ye long and far.
Ye'll never find such fountains—
Such as spring from Arkansas.

Name me a place in this big world
Where nature is its law.
Where plains and valleys so beautiful
By unfurl
As they do in Arkansas.

Majestic are her long leaf pines;
Her pearls are without flaw.
Beautiful are the rivers that grace-fully
wind
Way down in Arkansas.

Nowhere do flowers bloom so bright,
And musical is the crows' caw
As they wing their way in rapid flight
Way down in Arkansas.

So I've heard about enchanted lands—
Ye fairy lands—and all.
But when I die just let me rest
Way down in Arkansas.

The Badge of Honesty

Is on every wrapper of Doctor Pierce's
Golden Medical Discovery because a full
list of the ingredients composing it is
printed there in plain English. Forty
years of experience has proven its superi-
ority as a blood purifier and invigorat-
ing tonic for the cure of stomach disorders
and all liver ills. It builds up the run-
down system as no other tonic can in
downy states of the stomach, accom-
panied by indigestion or dyspepsia,
as well as in all bilious or liver complaints
and in all wasting diseases where there
is loss of flesh and gradual running down
of the strength and system.

"The Golden Medical Discovery" makes
rich, pure blood and so invigorates and
regulates the stomach, liver and bowels,
and through them the whole system.
Thus all skin affections, blotches, pimples
and eruptions as well as scrofulous swell-
ings and old open running sores or ulcers
are cured and healed. In treating old
running sores, or ulcers, it is well to in-
sure their healing to apply to them Dr.
Pierce's All-Healing Salve. If your druggist
don't happen to have this Salve in stock,
send fifty-five cents in postage
stamps to Dr. R. V. Pierce, Invalids' Hotel
and Surgical Institute, Buffalo, N. Y., and
a large box of the "All-Healing Salve"
will reach you by return post.

You can't afford to accept a secret nos-
trum as a substitute for this non-alcoholic,
medicine of KNOWN COMPOSITION, not
even though the urgent dealer may
thereby make a little bigger profit.

Dr. Pierce's Pleasant Pellets regulate
and invigorate stomach, liver and bowels.
Sugar-coated, tiny granules, easy to take
as candy.

Guess David Would.
Four-year-old Joe is very fond of Bi-
ble stories and evidently follows the
example of his best loved hero as to
meditation "in the night watches."
He wakened his mother one night
after midnight with the question,
"Mamma, where is David now?"
"In heaven, I guess, Joe."
"Will I go to heaven when I die?"
"I hope so, Joe."
"Mamma"—the little voice was very
eager now—"do you s'pose when I get
there David will just let me hold his
slingshot a little while?"—Delineator.

FIRE DESTROYS GREAT BALLOON

Count Zeppelin's Mammoth Airship Is Consumed.

FORWARD MOTOR EXPLODES

And the Big Craft Sails Away in a Cloud of Smoke, to Fall, a Hopeless Wreck, in an Open Field—Storm the Initial Cause of the Disaster.

Echterdingen, Aug. 6.—A dramatic end came to Count Zeppelin's long awaited endurance flight in his monster dirigible balloon, and the proud airship which Wednesday was cutting rapidly through the air and outdistancing pursuing automobiles, lies in an open field near here a mass of twisted, useless metal.

A chapter of accidents occasioned by bad moods of nature and by the failure of mechanical appliances combined was responsible for the untimely end of the balloon. Count Zeppelin, its inventor, almost heart-broken and unable longer to endure the sight of his shattered craft, has left by train for Friedrichshafen.

The airship had left Nackenheim, the scene of its first mishap, and over night had visited Mayence and had begun the homeward journey when misfortune overtook it. Soon after its departure, it was found that the front motor was working badly owing to the fusing of metal in the groove in which the piston rod ran. This was caused by friction. Consequently Count Zeppelin was compelled to rely on one motor on the rear platform throughout the night, which considerably reduced his speed. During the night, too, he made an ascent of nearly 6,000 feet, losing a considerable quantity of gas. This deprived the balloon of some of its buoyancy.

Over Echterdingen, Count Zeppelin decided to land. Although this was the first time that such a maneuver had been attempted with a rigid balloon, the landing was effected easily and smoothly, only one of the steel wire stays being broken. The engineers immediately set about making repairs to the balloon, which rode at anchor in the center of a large force of military which had been called out to keep the crowds away. Count Zeppelin telegraphed to Friedrichshafen for more gas cylinders and then went to a neighboring inn for luncheon. He was away somewhat over two hours and was destined to see only the wreck of his airship when he returned.

Large Crowd Present.

The local railway companies ran special cars to convey the curious sightseers to the spot, while pedestrians, automobiles and wagons loaded with peasants also flocked to the vicinity. It is estimated that the crowd around the monarch of the air numbered nearly 40,000.

A wind suddenly sprang up and some of the weatherwise bystanders called the attention of the officers to the fact that a storm was brewing and advised them to secure the balloon. Their warnings were unheeded.

The balloon swayed to and fro, sometimes rising a few feet from the ground. Finally a formidable gust of wind struck the airship broadside. At first the craft heeled over and then her bows rose in the air, carrying with them a number of soldiers holding the ropes. After poising for a moment at a height of fifty feet, it dashed forward against a cluster of fruit trees. The impact uprooted them. The airship returned to the earth and the forward motor exploded.

From the bows of the balloon shot forth a livid flame, while from the rear escaped thick clouds of black smoke, which caused the entire structure to disappear from view. When the air cleared the balloon was seen lying in an open field on a high plateau with only the ragged, tangled strips of the aluminum envelope still remaining. The metal stays and bands and portions of the motors were strewn about like old iron, and were blackened with smoke and scorched.

Officers rushed forward and found that several soldiers had been hurt. The four engineers who were on the forward platform of the airship had escaped death, but were suffering from injuries. They were taken to a hospital. The men tried, when the balloon broke away, to couple up the motors, so as to ascend beyond danger, but in this effort they were unsuccessful.

Count Zeppelin was immediately sent for. When he arrived and saw the hopeless wreck he broke down. His head was bowed on his chest and tears were streaming from his eyes as he stood in an attitude of despair in front of the shattered mammoth aeroplane. Then friends induced him to enter a motor car and return to Stuttgart, whence he left by train for Friedrichshafen.

ROCKEFELLER IN PERIL.

Magnate Has Narrow Escape From Being Hit by Train.

Cleveland, O., Aug. 6.—A man, said bystanders to have been John D. Rockefeller, by quick action probably saved himself and an automobile load of friends from what might have been a serious if not a fatal accident. The machine was being driven along the old avenue. At the Cleveland and Ashtabula railway crossing the auto-

JOHN D. ROCKEFELLER.

mobile was stopped while one of the party in the machine talked with a person who hailed them from the side walk. While thus standing a train approached and the gates were lowered.

The west gate fell across the machine and would have hit one of the occupants of the automobile had not the man supposed to be Mr. Rockefeller caught the guard and ordered the chauffeur to go ahead quickly. As they attempted to cross the tracks progress was interfered with by the east gate. The crossing watchman by this time became active and raised the east gate. An instant later the automobile cleared the tracks only a few seconds ahead of the passing train.

HITCHCOCK AND CORTELYOU MEET

Hold Important Political Conference in New York.

New York, Aug. 6.—An important conference between Chairman Frank H. Hitchcock of the Republican national committee and George B. Cortelyou, secretary of the treasury, who managed the Republican campaign four years ago, was held at the Manhattan hotel. Besides talking with Mr. Hitchcock about the political situation generally throughout the country, Secretary Cortelyou is thought to have taken up the question of the governorship of New York. At one time the head of the treasury department was credited in political circles here with being an aspirant for the Republican nomination and he was thought to be favored by some of the state leaders who have opposed the renomination of Hughes. He could not be seen here and Mr. Hitchcock declined to say what was talked about beyond admitting that he heard a great deal more about the state question. He declared that he did not express an opinion or offer a suggestion on the subject himself and that his part was that of a listener.

Representatives Bennett and Parsons, the latter chairman of the New York county Republican committee, were with Mr. Hitchcock for some time, their mission being the discussion of the gubernatorial nomination.

Several parts of the country were heard from by Mr. Hitchcock. He received a call from James T. McCleary, second assistant postmaster general, who is a candidate in Minnesota for a Republican congressional nomination. Mr. McCleary said that he was confident that the Republican state ticket would be elected in Minnesota this fall and that each congressional district would send a Republican to Washington. He expressed the opinion that Governor Johnson would not again take the Democratic nomination.

Charles P. Taft of Cincinnati, brother of the Republican nominee, was a caller at headquarters. He had a long talk with the chairman and then met the local newspaper men. He was greatly amused at their pointed questions concerning the cost of running a campaign, but would not tell how much it was costing him. He parried the questions good naturedly. He said Ohio was safely Republican.

TOWNS OUT OF THE FIRE ZONE

Flames Sweep Past Cranbrook, Michel and Hosmer.

DEATH LIST GROWS SMALLER

Now Estimated That Less Than Forty Persons Perished in the Burned Area—Disaster Has Struck a Hard Blow to the Mining and Smelting Industry.

Vancouver, B. C., Aug. 6.—The destructive forest fires in the Elk River valley have now burned past the region of the towns. Fernie is destroyed, but Michel, Hosmer and Cranbrook are now out of the danger zone. The flames are still devastating the timber region of the valley beyond the settlements. These bush fires may last a month, or until rain falls.

The total loss of life in the burned area is now placed at 38 and the property damage is estimated at between \$5,000,000 and \$6,000,000.

The women and children who were taken from Fernie and placed among the adjacent towns of Frank, Blairmore and Nelson are still in these places of refuge, but the men are back at Fernie and have begun the work of rebuilding the town.

Tents and supplies of food and clothing have been received at Fernie from many places and the people are working strenuously. Nurses and physicians are having a busy time looking after the injured and taking precautions to prevent pestilence. There are now two cases of smallpox in Fernie.

The Fernie disaster has struck a hard blow to the mining and smelting industry of British Columbia. The big smelters of the boundary district, employing 2,000 men, receive the bulk of their coke supplies from the coke ovens and mines of the Elk River valley, and as all collieries in that section are in such condition that it will require months to put them back in a position to supply coal in any quantity, the smelters will be forced to curtail their operations and in some cases shut down. This would throw several thousand men out of employment in the mines of the interior.

WHISKEY WAREHOUSES BURN

Heavy Loss From Fire Occurs at Midway, Ky.

Midway, Ky., Aug. 6.—Six immense bonded whiskey warehouses of Greenbaum Bros. distillery at this place are threatened with total destruction by fire, which started from an unknown cause in the rear of warehouse A and spread rapidly to the others. Four of the buildings were reduced to a mass of ruins and the others are now on fire. The flames have spread to the distillery proper, and a conflagration is threatened which may wipe out the whole town.

Thousands of barrels of whiskey in the warehouses have already burned and the loss from this source alone is estimated now at \$200,000.

As the big warehouses were engulfed in the flames thousands of barrels of whiskey burst and what was not consumed by the fire poured into a branch of Elkhorn creek near by. The whiskey on the water quickly caught fire and the creek became a fiery stream.

ATTENDED BY TAFT.

Session of the Virginia Bar Association at Hot Springs.

Hot Springs, Va., Aug. 6.—Candidate Taft evidenced his intense interest in legal affairs by attending the morning session of the Virginia Bar association and devoting the afternoon to the preparation of the speech on "The Law's Delay," which he is to deliver to that body.

The address of former Senator William Lindsay of Kentucky on "The Man and the Corporation," evoked considerable enthusiasm. Mr. Lindsay pointed out that it was the duty of the states to remedy what he regarded as the present day evil of corporate supremacy over the individual. The states, he maintained, created the corporations and it was their duty to control their creatures. This course, he said, would relieve the federal government from interference, which interference he regarded not only of doubtful constitutionality but of doubtful expediency.

"Marjory, isn't it getting late?" asked Mrs. Munn as she peeped into the parlor at 11:30 and interrupted a conversation between her daughter and her young man.

"Yes, mamma," replied Miss Munn sweetly; "it usually does at this time of night."

Hoop! Hoop! Hurrah!!!

11c

Ladies 15c to 20c Underwear at 11c

See the window full of ladies' underwear that we are selling at 11c. Not a garment but what sells for 15c regularly, and a large number at 17½c and 20c. Both vests and pants—some Misses' garments too. Compare this with any other bargain offered—no matter under what circumstances. But buy all you can use this year—next year too—just think of the price.

"MICHAEL'S" Bargain Basement "MICHAEL'S"

CANADIAN PACIFIC RAILWAY MEN OUT

About Twelve Thousand Mechanics on Strike.

Winnipeg, Man., Aug. 6.—Trade unionism in Canada has given its deft to the Canadian Pacific railway. Without any untoward incident or ostentatious show mechanics and kindred workmen quit work and all shops, big and little, on this great system are idle.

It is estimated that 12,000 men went out, the largest number being 2,200 in Montreal, and 1,500 here. Two thousand men outside of Winnipeg left work between Fort Williams and Vancouver, all at the dictates of the executive committee. Even old workmen in line for pensions went home and it seems to be the most complete tie up in the history of railway shops in this country. All workmen employed around train sheds at depots went out and conductors and engineers caused some delay to service by insisting on trains being properly made up before they would take them out.

Every wheel in the shops stopped and every fire died out when the whistle blew several short blasts, caretakers and shop foremen alone being left to put the places in shape for the period of idleness bound to follow.

The men gathered at their halls to appoint committees to carry on the strike. It was a determined crowd which was present here. A few young men tried to force an appearance of joviality, but the majority looked as if they fully realized the gravity of the step taken. They did not smile, but there was a grimness in their expression which denoted a resolution to stand by the action they had taken. Neither did they talk much, for their course had been decided upon and the talking stage had been passed. It was decided not appoint pickets at present. It is known, however, that the company has several hundred old country mechanics in cold storage who will be brought to the scene of action at once.

Among the strikers the talk is all on the early termination of the strike. Some are optimistic enough to believe that all will be over this week, relying upon the company to capitulate. There seems, however, to be a strong impression that the company has allowed matters to drift to see how far the men will go, and that the arrival here of William Whyte, second vice president, from Skagway Saturday will see a settlement of the difficulty.

Bristow for United States Senator.

Topeka, Kan., Aug. 6.—The nomination of W. R. Stubbs for governor and J. L. Bristow for United States senator on the Republican ticket at the primaries held Tuesday is now a certainty. Practically complete reports from sixty out of 105 counties give Stubbs a lead of 13,222. Of the 165 legislative districts in the state Bristow has carried at least 89.

John Temple Graves Ill.

New York, Aug. 6.—Colonel John Temple Graves, the candidate for vice president of the Independence party, is at a private hospital, where he will undergo a slight surgical operation. It is expected that he will be out in ten days.

BAFFLES THE POLICE.

Chicago Officers Unable to Solve Murder Mystery.

Chicago, Aug. 6.—Attempts to identify the mutilated and dismembered body of a boy that was found in Mud lake and the Illinois and Michigan canal have brought no results so far. The records of missing persons revealed no one whose description tallied with that of the murdered boy and the police are about ready to allow the case to go down as one of the unsolved murder mysteries of Chicago.

The evident intent of the slayer of the boy was to scatter the remains so that identification would be impossible. Thus far there is every indication that the work was successful in this regard. The legs were found by some boys who were playing near Mud lake, which is a stagnant widening of the south branch of the old bed of the Chicago river. The limbs, wrapped in old cloths, were at first thought to have been thrown away by medical students. This theory was abandoned, however, when decayed human intestines were found in the canal and a little later the hacked torso was discovered by boys who were swimming in the waterway.

Dr. Warren Hunter of the coroner's office made a thorough inspection of the gruesome remains and declared that they had all been part of the same body. He also asserted that the dismemberment had been done by someone ignorant of the principles of anatomy and said that the victim was a boy about seventeen years old.

The only tangible clue that the police have announced is the laundry mark upon a shirt found with the torso. This bore the initials "D. Z." and similar marks were found upon some collars contained in an old satchel picked up on the banks of the canal. A boy's cap, suspenders and other garments also were found in the satchel and the police are inclined to believe that the victim was a stranger in Chicago and came to his death as a result of some feud in one of the Greek or Italian colonies of the city.

The Punishment Fits the Crime.

A new consignment of punsters and professional jokers had just been brought before his Satanic majesty to receive sentence.

"And what shall their punishment be, sire?" asked the bodes executioner.

"To the caldron with them," laughed Satan. "Thus may it be put on record that to the very last they 'gabbed' over with humor."—Lippincott's.

Another Successful Flight.

Washington, Aug. 6.—Captain Baldwin made another successful flight at Fort Meyer in his new dirigible balloon. The balloonet, a balloon within a balloon, was tried for the first time. Mr. Curtiss, who again handled the planes and the motor, increased the speed, although the maximum was not attained. Only a short flight was made.

LYNCH VISITS BRYAN AT LATTER'S REQUEST

Assures Nebraskan That Johnson Will Support Him.

Lincoln, Neb., Aug. 6.—Of more than usual significance was the visit to Fairview of Frederick B. Lynch of St. Paul, Democratic national committeeman from Minnesota and manager of Governor Johnson's campaign for the Democratic presidential nomination. Mr. Lynch arrived in company with B. F. Nelson of Minneapolis, president of the state fair association.

The presence of Mr. Lynch at Fairview was at the special request of Mr. Bryan. He lost no time in conveying to the Democratic nominee Governor Johnson's assurance of loyal support and of the governor's intention to take the stump in Mr. Bryan's behalf.

"There is no animosity toward Bryan in Minnesota," said Mr. Lynch. "While I do not promise that the Democrats will carry Minnesota this year I think they have a very good chance."

The business that brought Mr. Nelson to Fairview was to invite Mr. Bryan to attend the state fair in St. Paul and deliver an address. The invitation was accepted, the date being fixed at Aug. 31, but with the understanding that there should be no charge for admission to the grounds on that day.

It was announced that the St. Paul speech would be the only one that Mr. Bryan will make in Minnesota during the campaign. The subject to be discussed will probably be the tariff.

BASEBALL SCORES.

American Association.

At Toledo, 5; St. Paul, 0.
At Columbus, 1; Minneapolis, 0.
At Indianapolis, 6; Milwaukee, 4.
At Louisville, 1; Kansas City, 0.
Second game—Louisville, 10; Kansas City, 2—five innings; stopped by rain.

American League.

At Chicago, 2; Boston, 3.
At Detroit, 5; Philadelphia, 3.
At Cleveland, 12; Washington, 1.
At St. Louis, 5; New York, 2. Second game—St. Louis, 6; New York, 1.

National League.

At New York, 4; Cincinnati, 4—nine innings; called at dark.

Milwaukee Man Drowned.

Chicago, Aug. 6.—Emil L. Essill, whose home was in Milwaukee, was drowned while bathing in Lake Michigan at Sixteenth street. He was unable to swim, yet waded past the guard ropes at the bathing beach at that point.

Strange that persons will use worthless flavoring extracts when natural flavors like

WEATHER FORECAST

Generally fair tonight and Friday
warmer extreme west portion tonight.

Aug. 6 In History.

1775—Daniel O'Connell,
Irish orator and pa-
triot, born; died 1847.
1792—Frederick North,
British statesman
known as Lord North,
died; born 1733.
North became prime
minister in 1770 and Lord North
precipitated the trouble with the
colonies which led to the Revolu-
tion. The result was disastrous to
his fame.
1809—Alfred Tennyson, British poet
laureate, born; died 1892.
1907—French and Spanish troops land-
ed at Casablanca under fire from
the Moors. French cruiser shelled
the town.

All old members of the high school
foot ball team are requested to meet at
the Y. M. C. A. Friday evening, at
7:30 p. m.

Miss Margaret Ponth, who has been
visiting at the home of Mr. and Mrs.
Arthur White, left for her home in Su-
perior today.

Velocipedes, express wagons, air
guns and rifles. D. M. Clark & Co. 277tf

Lozey and Dean have purchased a
handsome profile picture, a relief map
of the Yellowstone park which is in
their window.

B. L. Hollister, of the Aitkin Age,
came down today to meet his parents
who arrived from California to make
him an extended visit.

J. H. Lichter, of Deerwood, was in
the city today. He is limping around
as the result of spraining his knee in
getting out of a buggy.

Mrs. Frances Newman Dial, who
has been teaching the summer school
at Little Falls, left today for Power,
N. D., to spend her vacation.

Cool off. Get a White Mountain or
Arctic ice cream freezer. D. M. Clark
& Co. 277tf

Rev. M. S. Hostager, of Cloquet,
Minn., will preach in the Norwegian
Lutheran church on 7th street Sunday
morning and evening, August 9.

D. M. Clark & Co. have received
their new spring line of lace curtains
and draperies. 263tf

"Four Corners of the Earth," a
melodrama, will be the next attraction
at the opera house. It is scheduled to
appear in Brainerd Monday, August 17.

Mr. and Mrs. W. C. White and Mr.
and Mrs. Cuyler Adams, of Deerwood,
passed through Brainerd today on their
way to Yellowstone Park for an outing.

The three best made, Paragon, Ocean
Wave and O. K. washing machines.
D. M. Clark & Co. 277tf

Dr. Moorehouse returned last night
from a visit to Kansas City, Mo., and
in central Kansas, and expects to oc-
cupy the pulpit in the First Congrega-
tional church on Sunday morning.

The regular prayer service at the
Methodist Episcopal church will be held
this evening by the pastor. The choir
practice follows the service. All are
invited.

Jacob Schmidt's bottle beer is deli-
cious. We have the agency. Order a
case. Telephone 164 John Coates Liquor
Co. tf

Mrs. A. L. Mattes and daughter, of
Prince Albert, Saskatchewan, are in
the city visiting at the home of Mr.
and Mrs. W. I. Storm, on North Ninth
street.

According to a telegram from Aitkin
to the Duluth Herald the people of that
town are agitating the construction of
a trolley line to Rabbit Lake. If they
do that will cut Brainerd off from
any home profit from the mining dis-
trict.

Does baby want a go-cart? We have
what you want. D. M. Clark & Co. 277tf

Alfred Swanson, who graduated last
week from the scientific course in Val-
paraiso University, Valparaiso, Ind.,
arrived home Tuesday night accom-
panied by his brother Albert who went
down to attend the commencement
exercises. Alfred will take up the
study of law at the U. of M. next
September.

D. M. Clark & Co. the largest in
talent house in the city. Goods
sold on small payments. 263tf

The Sunday school picnic of the
Methodist Episcopal church held at
Merrifield yesterday proved to be a
most enjoyable one. Three coaches
took the crowd out which was an ex-
ceedingly large one. The day was
spent in boating, fishing, bathing and
base ball playing. The place and the
day was all that could be expected, the
crowd returning in good spirits in the
evening. Owing to the day being so
taken up with other out-of-door sports
the running races for prizes were pos-
tponed until one evening next week, the
place to be named later.

Attention sportsmen! We have a
full new line of trap shells, no left
overs. D. M. Clark & Co. 277tf

call up telephone No. 74. THE DIS-
PATCH is always glad to get any fresh
news items. The newer they are the
gladder we are to get them. tf

All interested in foot ball are
asked to meet at Bane's skating
rink this evening at 8 o'clock. 1t

W. E. Arnold and his bride arrived
here today from Isle Royal and other
eastern points. Mr. Arnold and Miss
Etta R. Morton were united in mar-
riage at the home of the bride's par-
ents, Rev. and Mrs. G. F. Morton, at
Winnebago City, Minn., July 29th.
The bride is well known here, her father
having formerly been pastor of the
People's church in East Brainerd. Her
many friends are glad to meet her
again and wish the newly married
couple much joy. Mr. Arnold formerly
worked in the offices at the shops here
and is now traveling auditor of dis-
bursements for the Northern Pacific
railroad company with headquarters at
St. Paul. He is a son of J. A. Arnold,
of East Brainerd.

How's This?

We offer one Hundred Dollars Reward for any
case of Catarrh that cannot be cured by Hall's
Catarrh Cure. F. J. Cheney & Co., Toledo, O.
We, the undersigned, have known F. J. Cheney
for the last 15 years, and believe him perfectly
honorable in all business transactions and finan-
cially able to carry out any obligations made by
him. W. L. DORR, KINMAN & MARVIN.

directly on the blood and mucous surfaces of
the system. Testimonials sent free. Price 75c
per bottle. Sold by all druggists.
Take Hall's Family Pills for constipation.

China, a Collection of Nations.
China is not a nation in the sense
in which we ordinarily use the word.
If we picture to ourselves the coun-
tries of Europe, with their different
languages and different customs, drawn
together into a loose confederation un-
der the government of a conquering
race, we shall have some small con-
ception of what this Chinese "nation"
really is. The peoples of these dif-
ferent European countries are all Cau-
casians. The different peoples of Chi-
na are all Mongolians. These Chinese
peoples speak eighteen or twenty dis-
tinct languages, each divided into al-
most innumerable dialects and subdia-
lects. They are governed by Manchu,
or Tartar, conquerors who spring from
a different stock, wear different cos-
tumes and speak among themselves a
language wholly different from any of
the eighteen or twenty native tongues.
—Samuel Merwin in Success Magazine.

A good gamecock has no white
feather in its plumage, and hence the
synonym for cowardice—"to show the
white feather."

THE PLANET JUPITER

A Monster World, 1,300 Times
the Size of Ours.

WHIRLS WITH AWFUL SPEED.

It Spins Around at Such a Fearful
Gait That a Furious Gale Perpetual-
ly Encircles Its Equator—Its Possi-
ble Inhabitants and Its Moons.

It is curious how little the average
person knows about Jupiter. He has
heard a lot, too much perhaps, about
Mars, but that world, 1,300 times the
size of ours, whirling in the terrible
outer distance of space with its five
moons, its 144 months yearly, known
as Jupiter is almost if not quite a mys-
tery.

In the first place, Jupiter, according
to some astronomers, is inhabited.
So are some of its moons, in the
midst of which the great planet spins
around like a top at such tremendous
speed that it causes around the equator
a furious wind that blows perpetually
at a rate of about 250 miles an hour.

In the midst of this never ending,
howling gale live the Jovians. Some
astronomers say that because Jupiter
is so much bigger and heavier than
the earth no creature of any weight
can support itself. A man weighing
200 pounds on this earth would, if car-
ried to Jupiter, weigh 500 pounds, and
reasoning thus, they believe that noth-
ing bigger than a cat could stand on
this vast world.

But this is no doubt a mistake. If
Jupiter stood still or revolved no faster
than our earth all that astronomy says
would be true, and a terrestrial man
could not stand upon its surface. But
as a fact the tremendous rate of revolu-
tion is so much faster than the earth's
that in spite of its monstrous
size it turns about in less than ten
hours as against our twenty-four
hours.

As it is, a man of normal earthly
size, if transported to the equator of
Jupiter, would actually feel much
lighter than he does here on earth, be-
cause the swift rotation of the planet
would almost lift him from his feet
and throw him into the heavens. He
would feel so light that the 250 mile
an hour tornado that blows incessant-
ly would pick him up and carry him
around and around the planet like a
speck of dust.

In order to keep on his feet the
Jovian man or woman would have to
be about fifty feet tall. Some of them
would doubtless reach the height of
fifty-five feet. Like all big bodies, the
Jovian would have a tendency to slow-
ness of motion. Having once seated
himself, he would spend a good twelve
hours at his breakfast and perhaps
eighteen at his dinner and would prob-
ably throw up his job if his employer
allowed him less than six hours for
his lunch.

The oceans of Jupiter, torn into fury
by the hurricanes, would pay no at-
tention to one moon such as moves the
tides on our earth, and it takes no
fewer than five of these satellites to
perform this work for Jupiter. They
travel at various rates of speed, some
flying very close to Jupiter's surface
and others far off. They have atmos-
pheres somewhat like ours on earth,
and a moonlight on Jupiter is indeed a
glorious sight, for these moons have a
variety of colors. Two are blue, one
is yellow and one red.

Jupiter needs all its moons at night
for illumination, for without them its
five hours of darkness would be black
indeed. So distant is the sun that
broad daylight is hardly brighter than
twilight on earth, and one lone moon
would not reflect enough of the sun's
rays to guide the Jovian footsteps.

In the polar and semipolar areas the
250 mile an hour tornado of the equa-
tor is not present. Doubtless there are
eddies and occasional windstorms such
as there are on earth. And in these
localities it is possible for smaller
creatures to exist, and here, too, vege-
tation would flourish. The food sup-
ply of Jupiter must come from these
areas, where it is cultivated and ship-
ped to the equatorial regions by the
diminutive races. The polar oceans
are not frozen because of the great
internal heat of Jupiter. And on these
still oceans probably ships not greatly
different from ours ply, but about the
equator the unending storm would
make surface sailing impossible.

If there are ships at all at the equa-
tor they are submarines, which dive
into the calm depths beneath the sur-
face. Locomotion by flying machines
is extremely easy on the equator be-
cause, by taking advantage of the
wind, the Jovians can navigate their
planet at tremendous speed.

It is possible that because of the
noise in the wind swept equator the
Jovian is deaf.

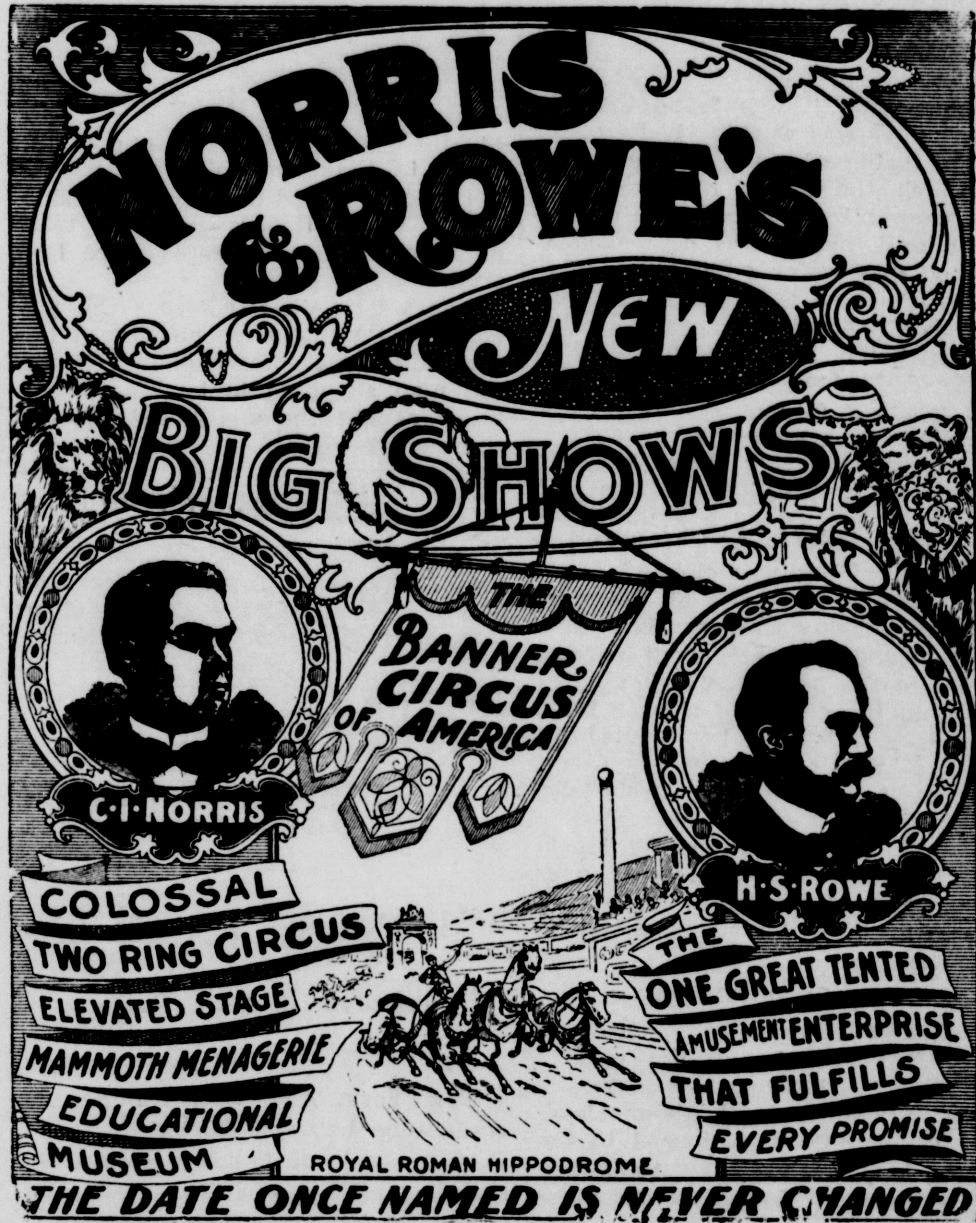

Quite likely, on the other hand, he
has good ears, but with a device, either
artificial or contributed by nature, for
stopping his ears, except when he
wishes to listen.

This tremendous, good natured Jov-
ian has a leather-like skin to protect
himself from the scratches of flying
things and a device for sifting the air
that he breathes, for Jovian atmos-
phere is full of dust, and in spite of
the difficulties of his existence he is a
long lived gentleman. On the average
he exists for about 800 of our years.
Probably many a Jovian exists a full
thousand of our little years.—Detroit
News-Tribune.

None of us may know when the echo
of a careless word will cease vibrating
in the hearts of some that hear.

What Shall We Have for Dessert?

Shoe Shop Moved

Notice to Union Men of Brainerd

Dear Sir:

There are a few factories that are listed in the Labor Review as being unfair to union labor, but there is not one of our factories on the list, so I was informed by the Labor Review this morning.

If there is anyone in Brainerd that questions this statement, you may ask them to write to the Piano and Organ Worker's union, of Chicago, and they will give them all the information along these lines that they may desire.

Thanking you very much for your inquiry, I beg to remain Yours truly

Now we believe that the broad-minded thinking people of Brainerd can readily see why such reports are circulated. It is simply the old story of "the dog in the manger." We are selling pianos of highest quality, at prices unheard of in your city. Call and see for yourself. Don't be a knocker.

For Sore Feet

For County Commissioner

The Time and the Price.

"What are the prices?"

Sewell-Diver

A very pleasant wedding took place at the home of Mr. and Mrs. J. T. Sewell 8 miles south of the city, on Wednesday, when their son, Burpee C. was united in marriage to Miss Harriet E. Diver, recently of England.

The bride wore a white silk gown and carried roses, the groom was dressed in conventional black. The couple were attended by the groom's two brothers and Miss Maude and Grace Caughey.

The young people will commence housekeeping at once on their farm a mile south of Mr. Sewell's old home.

Rheumatism promptly driven from the blood with Dr. Shoop's Rheumatic Remedy.

Real Fishing.

It is the waiting that is the real thing, that joy of expectancy which is a continuous picnic for the tranquil reveries, that serene vision which sees the fishes hobnobbing with the bait and admires their wisdom in refusing to bite.

Fishing isn't simply catching something. It is sitting in silence where the sunbeams filter through the green leaves and the turtle creeps safely upon yonder log and the woodpecker thrums in the dead tree near by—there, seeking communion with the underworld and playing with one's fancies down in the green waters—that's fishing.

Piles get quick and certain help from Dr. Shoop's Magic Ointment.

BRAINERD MARKET PRICES

Prices Paid for all Kinds of Stock and Country Produce by Brainerd Merchants

Steers, live.....	3.00 to 3.50

Eggs.....	.22
Potatoes new.....	.50 to .60
Wild hay \$6.00 to \$7.00 per ton.	
Timothy and clover \$8.00 to \$9.00 per ton.	

Where the Funds Went.

As an instance of the happy go lucky character of the early darcy the following extract from the Albany (N. Y.) city records may prove interesting:

"In 1826 the trustees of the African Baptist church applied to the common council for permission to circulate a public subscription paper in aid of the funds of the church. It was moved to lay the petition on the table, pending investigation, for the reason that the principal part of the funds secured by a previous subscription for the African church had been used by the trustees in 'treating themselves to hot suppers.'"

Presidential Succession.

During the first session of the Forty-ninth congress (1885-7) the presidential succession was fixed as follows: In case of the death or removal of both president and vice president the secretary of state shall act as president until the disability of the president be removed or a president is elected. If there be no secretary of state, the secretary of the treasury shall act as president. And the succession passes in like manner to the secretary of war, the attorney general, the secretary of the navy and the secretary of the interior, in the order here given.

Cultivate Your Power.

Do not pray for easy lives. Pray to be stronger men. Do not pray for tasks equal to your powers. Pray for powers equal to your tasks. Then the doing of your work shall be no miracle. But you shall be a miracle. Every day you shall wonder at yourself, at the richness of life which has come in you by the grace of God.—Phillips Brooks.

Faded.

Tess — Yes, she said her husband married her for her beauty. What do you think of that? Jess—Well, I think her husband must feel like a widower now.—Philadelphia Press.

BRAINERD MILL EQUAL OF ANY

No Mill in Northwest Will be More Up-to-Date Than Brainerd Will Have

MILL WRIGHTS NEARLY THROUGH Expected that Mill Will Commence Grinding in About Two Weeks

The mill wrights will finish their work of rebuilding the Brainerd mill early next week and the head miller will then start the machinery. That it will take some time to get it properly adjusted is practically certain and the management is setting no date for the commencement of business. It will probably be about two weeks, however, before it is running in full blast.

The mill with its new equipment, has a capacity of about 100 barrels per day of 24 hours and it is expected that it will be run night and day. It will be equipped with six sets of double rolls, two sifters and other machinery to match. One of the new features will be a bleacher. This machine, by means of a current of air turned against a cylinder in which the flour is revolved, cools it and whitens it and as the miller terms it "ages" the flour. It has long been known that one reason the big milling companies could put better flour on the market than the small mills was because they had sufficient capital and warehouse room to hold the flour several months or a year before selling it. Under the new process to be used in the Brainerd mill this result is obtained at once and new flour, or flour made from new wheat, will make as good and as white bread as flour from old wheat which has aged after being ground.

The Brainerd Milling Company has put over \$6000 into improvements in the mill, in addition to the purchase price. They stated when they began work that while they would appreciate the patronage of Brainerd people they did not and would not ask it because they were a Brainerd concern, but because they would make the best flour on the market.

Mr. J. L. Hamel, who is in charge of the rebuilding of the mill for the Mardike-Marmon people who have the contract for the machinery, etc., in conversation with the DISPATCH representative, stated there was not a better mill, or one which could make better flour, in the United States. Such being the case the Brainerd people should make it a matter of duty to insist on their grocers sending them Brainerd flour.

Strengthen your weak stomach, heart, and kidney nerves with Dr. Shoop's Restorative. Don't drug the stomach nor stimulate the heart or kidneys. That is wrong. Vitalize these weak inside nerves with Dr. Shoop's Restorative and see how fast good health will come to you. Sold by H. P. Dunn. t

BASE BALL NOTES

The North Star Juniors defeated Verndale yesterday by a score of 6 to 5 in a game which was spectacular at times by reason of the fast plays made. Dean White was in the box for Brainerd, and while he did not have his usual control and issued a few passes only two hits were got off his delivery. He was well supported and the game was a fast one.

The North Stars will go to Perham next Sunday and play there in the afternoon.

She Likes Good Things

Mrs. Chas. E. Smith, of West Franklin, Maine, says: "I like good things and have adopted Dr. King's New Life Pills as our family laxative medicine, because they are good and do their work without making a fuss about it." These painless purifiers sold at H. P. Dunn's drug store. 25c. tts

Why James Lee Got Well

Everybody in Zanesville, O., knows Mrs. Mary Lee, of rural route 8. She writes: "My husband James Lee, firmly believes he owes his life to the use of Dr. King's New Discovery. His lungs were so severely affected that consumption seemed inevitable, when a friend recommended New Discovery. We tried it, and its use has restored him to perfect health." Dr. King's New Discovery is the king of throat and lung remedies. For coughs and colds it has no equal. The first dose gives relief. Try it! Sold under guarantee at H. P. Dunn's drug store. 50c. and \$1.00. Trial bottle free. tts

Any pain stopped in 20 minutes sure. Dr. Shoop's Pink Pain Tablets quickly stop headache, pains of women, etc., 20 tablets 25c. Sold by H. P. Dunn. tt

DEERWOOD NOTES

Miss Dalie L. Wetzel left a week ago Monday for Duluth, where she will spend the time at the normal until school begins again studying primary methods and preparing for a first grade certificate.

Paul K. Wetzel was a Brainerd visitor between trains on Monday.

Monday afternoon six young ladies and Mrs. Murphy came down on the train from Brainerd remaining until the midnight train. They took supper at the Tourist's Home.

Mr. Forman and his friend Mr. Sonnie, from Chicago, are spending their vacation at the Tourist's Home.

Dr. Archibald and a Mr. Thompson, from Troy, N. Y., have been domiciled at the Tourist's Home for the past month.

Gust Fredericks, from Cedar Lake, was around the last of the week with fresh eggs and mutton. Eggs sell well at this time of the year and demand a big price.

The Y. M. C. A. boys from Duluth came up on Monday and will camp at their old camping grounds for two weeks. Camp Miller is a popular camp and this is certainly an ideal outing for boys who are overseen by trustworthy men.

Miss Maud Hage and Miss Norma Wright went to Brainerd Tuesday noon, returning Thursday afternoon. They were sent as delegates to the county convention from the Deerwood Sunday school.

Miss Helen Thompson, a niece of Mrs. Hage, came up from the southern part of the state and will visit relatives for a few weeks.

Mr. and Mrs. Shelton, from Rhineland, Wis., came up on Monday noon to visit with Judge and Mrs. A. J. Vinji for a while.

Since the work train is stationed at Deerwood it keeps the men hustling to find boarding places, as nearly all the available places are taken by summer people first.

Raspberries are ripening fast and demand a good price in all the markets. Although they are not as plentiful as last year the difference in price will make the profit about the same.

Miss Olga A. Wetzel left on Thursday for a ten days visit at the twin cities and Manchester, Iowa, with friends.

Mr. and Mrs. Guy Casey, from Aitkin, have rented the cottage from Harry Patterson. They have as their guests Mr. and Mrs. Minette from Fargo, N. D.

At the school election Paul K. Wetzel was elected director for a term of three years.

At the wreck at Barker a week ago Mail Clerk Wetzel was pretty badly bruised and received quite a nervous shock and it is wonderful he was not killed considering how the mail car was splintered. He is home for a rest and is in hopes no complications of any kind set in.

The band boys are invited out to Cedar Lake at Fritz Hamdoef's for supper Sunday evening. They will go by train leaving Deerwood on the 3 o'clock train, returning on the 11:21. Mr. Hamdoef will meet them by team at the station and the boys will no doubt have an enjoyable time. Mr. and Mrs. Hamdoef are royal entertainers. Their son Henry Hamdoef plays first cornet in the band so are naturally much interested in the band.

Mr. and Mrs. Ole Norseth are the proud parents of a baby girl born July 27th.

Mrs. Norseth and little daughter Margaret, from St. Paul, came down the 23d of July to spend a couple of months with Mr. and Mrs. Ole Norseth. John Oberg's store is coming along in fine shape and we are in hopes John will be serving ice cream before cold weather.

Some of the boarders at the Tourist's Home had a hay rack party out to Bay Lake Tuesday evening. We know from the noise they made that they were having a good time.

Miss Minnie Parish, from Pine City, is here visiting her uncle, Rev. Parish, for a few days.

Excellent Health Advice

Mrs. M. M. Davison, of No. 379 Gifford Ave., San Jose, Cal., says: "The worth of Electric Bitters as a general family remedy, for headache, biliousness and torpor of the liver and bowels is so pronounced that I am prompted to say a word in its favor, for the benefit of those seeking relief from such afflictions. There is more health for the digestive organs in a bottle of Electric Bitters than in any other remedy I know of." Sold under guarantee at H. P. Dunn's drug store. 50c. tts

"Jove, you acted awfully well last night!"

"Indeed! The audience did not seem to think so. They did not applaud a bit when I made my exit from the stage."

"Oh, but I'm sure they were awfully pleased!"—London Opinion.

"Health Coffee" is the cleverest imitation of real coffee ever yet made. Dr. Shoop created it from pure parched grains, malt, nuts, etc. Fine in flavor—is made in just one minute. No 20 or 30 minutes tedious boiling. Sample free. McGinn & Smith. t t

Opening Piano Sale

YOU have read all about it and we take it that you are just as wide-awake as we are—and on watch. If you buy a Piano of us today you add a clean profit to your assets of \$150 to \$250—a good month's salary. You owe an investigation to yourself.

Pianos	made to sell for \$390.00 sale price	\$147
Pianos	made to sell for \$350.00 sale price	\$187
Pianos	made to sell for \$400.00 sale price	\$218
Pianos	made to sell for \$500.00 sale price	\$239
Pianos	made to sell for \$550.00 sale price	\$287
Pianos	made to sell for \$600.00 sale price	\$325

Our Payment Plan—nothing down—\$6.00, \$8.00 and \$10.00 per month has made a hit.

Segerstrom Piano Company IMPERIAL BLOCK

Meat Platters 10c For one day only Saturday, Aug. 8th

The biggest and best MEAT PLATTERS that ever sold in Brainerd for 10c. Our show window is full of Platters. We have only 300 of them, so come early. Saturday, August 8th, 1908, for first choice.

D. A. Peterson Phone call 82 214 7th St. South

The Dispatch has on hand a number of thousands of envelopes with views of Brainerd printed on them with a space for business card. Order now.

M. K. SWARTZ M. K. SWARTZ

A Real Genuine Novelty

Are those real coin Broaches, Hat Pins, Chain Tabs, Cuff Buttons and Stick Pins made from Real Coins, which can be seen in Swartz's show windows.

New Novelty Post Cards

We have a late new novelty in local view post cards—also "The Merry Widow" and "Summer Girl"—all new.

At Our Soda Fountain

Everything is up-to-date and the best of all is those nice Ice Cream Cones filled full of Milton Ice Cream. You should try our late and exclusive "Woodland" Nut Sundee—Violet flavor.

M. K. SWARTZ

SEVERE STORMS BREAK HOT WAVE

Bring Relief to New York and
New England States.

TEN DEATHS FROM THE HEAT

Occur in the Metropolis Before the
First Cooling Breeze Comes—Con-
siderable Property Damage Done by
the Storm—Cooler at Chicago.

New York, Aug. 6.—Severe elec-
trical storms, accompanied by heavy
rain and in some instances by damag-
ing showers of hail, broke the heat
wave that has been afflicting New
York and the New England states.
The storm brought great relief to this
city, for during the day ten deaths
and more than twenty prostrations
were caused by the heat and exces-
sive humidity. Even early in the day
the hospitals were caring for many
prostrated. The mercury stood at 90
degrees at 2 o'clock and was still as-
cending an hour later when the first
cooling breeze came. In a few min-
utes it had dropped ten degrees and
by nightfall there was little to com-
plain of.

From all sections of New England
and New York came reports of dam-
age done by the storm. Lightning
struck in many places, and at Green
Island, near Troy, N. Y., Mrs. Thomas
McCabe was killed by a bolt.

At Jamestown, N. Y., the storm was
especially severe, driving several
craft ashore on Chautauque lake.

Four Rhode Island churches were
struck by lightning, the one at Providence
being levelled to the ground.
Total loss of more than \$10,000.

Among those killed by the heat in
this city was the Rev. Edward Wall-
ace-Neil, pastor of the Protestant
Episcopal Church of St. Edward the
Martyr. He was overcome just be-
fore he had officiated at morning
service and died within a few minutes.

COOLER IN CHICAGO.

But Three Residents of That City Suc-
cumb to the Heat.

Chicago, Aug. 6.—Despite a decid-
ed change for the better in weather
conditions here, three more residents
died as the result of heat prostrations.
Early in the day the humidity was
high and the temperature increased
steadily until after 1 o'clock. Then a
shift in the wind sent the humidity
mark down to 39 per cent and also
halted the increase in the heat wave.
The ill effects of the previous day's
heat was still apparent in the tenement
districts, where the mortality
rate among infants has become ab-
normally high. Because of the in-
creased use of water on park and
private lawns the water supply in
some residence sections has dwindled.

JOHN G. LUND A SUICIDE.

Prominent Minneapolis Man Ends
Life With a Bullet.

Minneapolis, Aug. 6.—John G. Lund,
one of the most prominent real estate
men in the Northwest, committed sui-
cide in his private office in this city.
He shot himself in the head directly
behind the right ear. Death followed
almost instantly. Business difficul-
ties, grief over the death about a year
ago of his wife and a general impair-
ment of his own health are believed
to have induced despondency that led

to Mr. Lund's act of self-destruction.
Since his wife's death, his friends say,
he had never ceased to mourn. Money
losses, too, had troubled him serious-
ly. Negotiations made by several of
his agents proved to be fraudulent.
It is said, and he had been called upon
to square all the deals. This caused
his fortune, which was at one time
estimated at several hundred thousand
dollars, to diminish rapidly, and cred-
itors were besieging him from every
side. Several cases had been settled
without litigation, but it is believed
that he could have gone no further
without declaring himself a bankrupt.

PARADE IN BOSTON.

Ten Thousand Pythians March
Through the Streets.

Boston, Aug. 6.—Ten thousand
members of the subordinate lodges of
the Knights of Pythias paraded
through Boston's streets. Never be-
fore in Boston has there been a pa-
rade marked by such diversity of fea-
tures, so much color and originality
in the various floats.

No business was transacted by the
Pythians during the day.

There seems to be no doubt that
Henry P. Brown of Texas will be
elected supreme chancellor. Milwau-
kee appears to be leading for the place
of holding the next convention.

THAW GETS AN OUTFIT.

Law's Delays Make Excursion Possi-
ble for Famous Prisoner.

Poughkeepsie, N. Y., Aug. 6.—Harry
K. Thaw had an outing consisting of
a trip to Fishkill Landing, sixteen
miles away, a trolley ride of five
miles and a return trip by river
steamer to this city.

The law's delays made this little ex-
cursion possible. Thaw has a suit
pending before Referee John F.
Schlosser at Fishkill Landing to fix
the value of the services of Dr. John
P. Wilson, one of his experts, who tes-
tified in his habeas corpus suits.

The first hearing was fixed for 11
a. m. Thaw was on time, in charge
of Under Sheriff John M. Townsend
and Deputy Sheriff W. A. McCabe.
The lawyers were not ready, however,
and the referee was called away on
business.

Two adjournments were taken and
to while away the time, Thaw, ac-
companied by the sheriff's officers,
took a ride by trolley to Fishkill vil-
lage. The return trip to Poughkeepsie
was made by steamer.

Old Outlaw Killed.

Douglas, Ariz., Aug. 6.—William F.
Downing, a member of the old Stiles-
Alford band of outlaws who ten years
ago operated in Southern Arizona,
was killed in his saloon at Wilcox by
an Arizona ranger, William Speed.
Speed sought to serve Downing with
a warrant when the latter, it is said,
displayed a gun, whereupon Speed
fired.

Disastrous Fire in Germany.

Donaueschingen, Germany, Aug. 6.
—A number of persons were burned
to death and 100 houses were de-
stroyed by fire here. There was no
water with which to extinguish the
flames, but fortunately a heavy rain
fell and stopped the progress of the
conflagration.

Killed While Trying to Escape.

San Francisco, Aug. 6.—William
English, a private in Company 115,
coast artillery, awaiting trial for de-
sertion, was shot and killed at the
Presidio while trying to escape.

Russian Consul Stabbed.

Shanghai, Aug. 6.—The Russian
consul at Tientsin, M. Poppe, was
stabbed and it is not expected that he
will recover from his wound. His as-
sailant escaped.

MARKET QUOTATIONS.

Minneapolis Wheat.

Minneapolis, Aug. 5.—Wheat—Sept.,
\$1.07; Dec., \$1.04½. On track—No. 1
hard, \$1.25; No. 1 Northern, \$1.22;
No. 2 Northern, \$1.18; No. 3 North-
ern, \$1.12 to 1.14.

Duluth Wheat and Flax.

Duluth, Aug. 5.—Wheat—To arrive
on track—No. 1 hard, \$1.18; No. 1
Northern, \$1.17; No. 2 Northern,
\$1.12; Sept., \$1.06½; Dec., \$1.03½.
Flax—To arrive, on track and Sept.,
\$1.34; Oct., \$1.32½; Nov., \$1.32½;
Dec., \$1.30.

St. Paul Union Stock Yards.

St. Paul, Aug. 5.—Cattle—Good to
choice steers, \$6.00 to 6.75; fair to good,
\$5.00 to 5.75; good to choice cows and
heifers, \$4.00 to 5.00; veals, \$3.75 to 5.00.
Hogs—\$6.00 to 6.70. Sheep—Wethers,
\$4.00 to 4.35; yearlings, \$4.25 to 5.00;
spring lambs, \$6.00 to 6.75.

Chicago Grain and Provisions.

Chicago, Aug. 5.—Wheat—Sept.,
96½ to 96¾c; Dec., 98½ to 99c; May,
\$1.03½. Corn—Sept., 76c; Dec., 85c
to 85½c; May, 66½c. Oats—Sept.,
47½c; Dec., 47c; May, 49c. Pork
—Sept., \$15.80; Oct., \$15.90; Jan.,
\$16.50. Butter—Creameries, 18 to 20c;
dairies, 17 to 19c. Eggs—17½c. Poul-
try—Turkeys, 14c; chickens, 12c;
springs, 15c.

Chicago Union Stock Yards.

Chicago, Aug. 5.—Cattle—Beaves,
\$3.70 to 7.55; Texans, \$3.50 to 5.25; West-
ern cattle, \$3.60 to 5.80; stockers and
feeders, \$2.40 to 4.40; cows and heifers,
\$1.50 to 5.50; calves, \$5.50 to 7.25. Hogs
—Light, \$6.15 to 6.85; mixed, \$6.20 to
6.95; heavy, \$6.15 to 6.95; rough, \$6.15
to 6.40; good to choice heavy, \$6.40 to
6.95; pigs, \$5.20 to 6.15. Sheep, \$2.50
to 4.50; yearlings, \$4.40 to 5.10; lambs,
\$4.50 to 6.60.

SMOKELESS WARSHIP

Swift, Noiseless Fighting Vessel
Predicted by an Engineer.

WHOLE DECK FOR GUN PLAY

No Stacks to Obstruct Fire, and All
Vulnerable Parts Will Be Below Wa-
ter Line—Great Saving of Coal
Steam Radius Will Be Increased.

"War vessels of the future will be
swift, smokeless, noiseless, the craft
lying low in the water, with every
vulnerable part below the water line,
the entire deck being given over to the
work of the guns. There will be no
smoke because there will be no smoke-
stacks. In the nighttime there will be
nothing to betray the presence of
this invincible fighting demon to the
enemy."

This prediction was recently made by
Robert Haywood Fernald, mechanical
engineer, who has for several years
been connected with the fuel investi-
gations of the United States geological
survey in behalf of the government's
campaign for the conservation of the
natural resources of the country. Mr.
Fernald believes that the gas engine
or internal combustion motor, as it is
called by engineers, will be installed in
naval vessels of the United States
within the next few years.

The purpose of the government has
been to develop the gas engine as a
means of conserving the coal supply.
Experts declare that if the present in-
crease in consumption keeps up the
better part of the coal will be gone be-
fore the close of the next century and
that the nation will long before that
feel the effects of a waning supply.
The government itself spends \$10,000,
000 yearly for coal, and it was primary-
ly to get the best results from this ex-
penditure that the investigation of the
gas producer and gas engine was taken
up.

"I expect to see the United States
ahead of every other nation in this in-
novation," said Mr. Fernald. "The gas
engine, in my opinion, is feasible on
any vessel because of its economy over
the steam engine, but it is especially
desirable on the fighting ship for the
reason that it makes no smoke. The
gas is generated in a producer, which
has no chimney and needs none. The
coal is turned directly into gas, which
goes straight to the engine."

"The smoke nuisance has been a seri-
ous problem to the navies of the world
for a number of years. In the day-
time the presence of an enemy's ship
has been discovered miles away by the
smoke from its stacks, and in the night
flames from the tops of the stacks
have spoiled many a well laid plan of
attack."

"The elimination of the smoke is
sufficient to call for the installation
of the gas engine, yet there are many
other features in its favor. The vessel
would have a free deck for the play
of its big guns. There would be no
towering stacks to puncture or destroy,
thus perhaps crippling the boat. Then
it would be unnecessary to carry as
much coal, for the same power can be
developed with one-third less than the
steam engine uses. The gas producer
and the gas engine would take up less
room and weight than the same power
Scotch boiler and steam engines. If it
were necessary it would be possible to
carry more coal, which would give the
vessel a radius of travel far greater
than at present."

"Of course I do not expect to see gas
engines confined to the use of the
navy. The fact that it shows econ-
omy will compel its installation in all
sorts of vessels. One of the big items
of expense to the modern ocean liner
is its coal bill. These vessels will con-
sume 10,000 tons of high grade coal on
a round trip. With the gas engine this
could be reduced to 6,000 or 7,000
tons, a saving of several thousand dol-
lars."

"One of the big steamship companies
of the great lakes is about to make
the initiative in this movement. Plans
have been made for a freighter that
will use a 2,000 horsepower gas engine.
This company is not making the ex-
periment because of the smoke from
the stacks of its vessels, but to demon-
strate the economy of the gas engine
over the steam engine. At present this
concern is paying \$3 a ton for coal,
and its managers figure a considerable
saving if the gas engine proves a suc-
cess in marine work, and I see no rea-
son why it should not. Already the
marine type of gas engine has been
designed up to 2,000 horsepower. The
future will see much larger units."

"The government, through the United
States geological survey, has been ex-
perimenting with the gas producer and
gas engine for several years and has
demonstrated that this type of engine
in a stationary plant is capable of gen-
erating from twice to three times as
much power from a given amount of
coal as the steam engine. It has also
shown that the gas engine can develop
more power from a low grade coal,
such as lignite of North Dakota, than
the steam engine can with the same
weight of the best bituminous coal."

"The tests in the gas producer at the
government plant have shown that
many fuels of such low grade as to
be practically valueless for steam fur-
nace purposes, including slack coal,
bone coal and lignite, may be econ-
omically converted into producer gas and
may thus generate sufficient gas power
to render them of high commercial
value. In this way lignite beds un-
derlying from 20,000,000 to 30,000,000
acres of public lands, heretofore sup-
posed to have little or no commercial
value, are shown to have a large value
for power development. This is of im-
portance to the west."

MOVING PICTURES' NEW USE.

Modern Farming Methods to Be Shown
in Novel Way.

Like the phonograph, the moving pic-
ture machine is to be made to serve
a more worthy purpose than gathering
in the nickels and dimes at small the-
ater doors. It is to be put to the most
practical purpose imaginable—showing
modern methods on the farm.

C. W. Martin, an Omaha insurance
man, has demonstrated that the mov-
ing picture machine was made for a
more worthy purpose than reproduc-
ing a prize fight by rounds, showing
children how daring firemen rescue
people from burning buildings or
throwing upon a white sheet a Mex-
ican bullfight or the dancers of a bal-
let show.

As a result of a conference with the
managers of the national corn ex-
position, which is to be held at Omaha
Dec. 9 to 19, Martin is visiting the
"model" farms of Illinois, Iowa and
Nebraska and making pictures which
are to be later shown at the big agri-
cultural show in Omaha and the var-
ious colleges and experiment stations in
the west. Farmers will be shown on
the canvas using the latest planting,
cultivating and harvesting machinery,
says an Omaha correspondent of the
Chicago News. While a lecturer ex-
plains the process the model farmers
will be seen going about their work.

Every one will be interested in
knowing something more of the pro-
cess responsible for the loaf of bread
that comes to the table daily. The
moving picture camera will show the
modern wheat drill at seeding time,
the perfection self binder which cuts
the grain, binds, bunches, ready for
the shockers at one process, and the
modern steam thrasher which cuts the
bands from the bundles, feeds the
grain into the machine with more than
human precision, separates the grain
from the straw, fans and cleans it
ready for the great mills and elevates
the grain into the wagon ready for its
journey from the farm to the flouring
mills.

TIN CAN CLUBS.

Their Mission Is to Supply the De-
mand For New Forests.

B. H. Green of Monterey, Cal., has
sent out a circular giving information
regarding the tin can clubs through
whose beneficent activities he expects
to see the United States supplied with
needed forests.

The attempts to cultivate tree claims
in the Dakotas many years ago were
rather discouraging, says the National
Magazine, but Mr. Green insists that
he has been successful in planting tree
seeds, nuts and cuttings in refuse tin
cans and can now show an oak tree
twenty feet high only eight years of
age, and also a redwood tree, grown
from seed, which is now fully thirty
feet high and only twelve years of
age.

Mr. Green insists that a tomato can
with a fair sized hole punched in the
bottom and filled with good earth is
just the thing needed to start a tree in
and that if the earth is never allowed
to become dry the growth of the young
tree will be amazing. Later the little
trees are transplanted without remov-
ing from the cans, for the rust eats
away the can sufficiently to allow the
roots to free themselves as they need
more room.

Taft Club of Fat Men.

The giants who shackle hogs and las-
so cattle in the Chicago stockyards
have organized the first "fat man's
Taft club." No man is eligible who
weighs less than 230 pounds. Frank
L. Beveridge, a commission man, who
weighs 285, is the president.

One member weighs 360 and is still
growing up and out. He is Everett
Jackson, twenty-eight years old. This
is their platform:

"Realizing the heavy importance of
good and well bred men working to-
gether in harmony and in view of add-
ing weight to the political situation
and showing our preponderous appre-
ciation of the greatness of our Republican
convention in nominating such a large
and manly expansionist as they did,
we hereby organize ourselves in what
will be termed "a fat man's Taft club
of the Union stockyards of Chicago."

New Job For Women.

The steamship Carmania of the Cu-
nard line has a woman assistant for
the purser to answer many of the
questions which that hard worked au-
thority is asked previous to the sail-
ing of the vessel. She is Miss Cath-
arine Leith, who is described in the
passenger list as "typo and steno." It
is said that other ocean liners may
adopt the idea.

Ode by an Olympic Competitor.

[A poem written by the young Univer-
sity of Virginia sprinter James Alcorn
Rector just before departing for London
to participate in the Olympic games.]

I've heard about the enchanted lands—
Ye fairy lands—and all,
But when I die just let me rest
Way down in Arkansas.

Where may ye find such mountains?
Search ye long and far,
Ye'll never find such fountains—
Such as spring from Arkansas.

Name me a place in this big world
Where nature is its law,
Where plains and valleys so beautiful
ly unfurl
As they do in Arkansas.

Majestic are her long leaf pines;
Her pearls are without flaw.
Beautiful are the rivers that grace-fully
wind
Way down in Arkansas.

Nowhere do flowers bloom so bright,
And musical is the crows' caw
As they wing their way in rapid flight
Way down in Arkansas.

So I've heard about enchanted lands—
Ye fairy lands—and all,
But when I die just let me rest
Way down in Arkansas.

The Badge of Honesty

Is on every wrapper of Doctor Pierce's
Golden Medical Discovery because a full
list of the ingredients composing it is
printed there in plain English. Forty
years of experience has proven its super-
ior worth as a blood purifier and invigor-
ating tonic for the cure of stomach disor-
ders and all liver ills. It builds up the run-
down system as no other tonic can in
which alcohol is used. The active medi-
cal principles of native roots such as
Golden Seal and Queen's root, Stone
and Mandrake root, Bloodroot and Black
Cherry bark are extracted and preserved
by the use of chemically pure, triple
refined glycerine. Send to Dr. R. V. Pierce
at Buffalo, N. Y., for free booklet which
quotes extracts from well-recognized med-
ical authorities such as Drs. Bartholow,
King, Scudder, Coe, Ellingwood and a
host of others, showing that these roots
can be depended upon for their curative
action in all weak states of the stomach,
accompanied by indigestion or dyspepsia
as well as in all bilious or liver complaints
and in all wasting diseases where there
is loss of flesh and gradual running down
of the strength and system.

"The Golden Medical Discovery" makes
rich, pure blood and so invigorates and
regulates the stomach, liver and bowels,
and through them, the whole system.
Thus all skin affections, blotches, pimples
and eruptions as well as scrofulous swell-
ings and old open running sores or ulcers
are cured and healed. In treating old
running sores, or ulcers, it is well to in-
sure their healing to apply to them Dr.
Pierce's All-Healing Salve. If your drug-
gist don't happen to have this Salve in
stock, send fifty-four cents in postage
stamps to Dr. R. V. Pierce, Invalids' Hotel
and Surgical Institute, Buffalo, N. Y., and
a large box of the "All-Healing Salve" will
reach you by return post.
You can't afford to accept a secret nos-
trum as a substitute for this non-alcoholic,
medicine of known composition, not even
though the urgent dealer may
thereby make a little bigger profit.
Dr. Pierce's Pleasant Powders regulate
and invigorate stomach, liver and bowels.
Sugar-coated, tiny granules, easy to take
as candy.

Guess David Would.
Four-year-old Joe is very fond of Bi-
ble stories and evidently follows the
example of his best loved hero as to
meditation "in the night watches."
He wakened his mother one night
after midnight with the question,
"Mamma, where is David now?"
"In heaven, I guess, Joe."
"Will I go to heaven when I die?"
"I hope so, Joe."
"Mamma"—the little voice was very
eager now—"do you s'pose when I get
there David will just let me hold his
slingshot a little while?"—Delineator.

Piles

We are so certain that
itching, bleeding and
protruding piles can al-
ways be relieved and ab-
solutely cured by this
ointment that we positively guarantee satis-
faction or money refunded.
